# Saint Lawrence Secondary School École Secondaire Saint - Laurent

## MISSION STATEMENT

Every day we strive to provide support and opportunities for students to become engaged in their learning environment.

## VISION STATEMENT

To engage every child to reach his or her full potential.

## SLSS VALUES

We value respect for all; success for all students; a safe learning environment; positive relationships; and diversity and multiculturalism.

*At Saint Lawrence,  
we care and dare to say:  
"Vive la différence!"*

## Student Connections

As Saints and Educators:

We will model and foster the everyday values of being a "good citizen" and develop a sense of belonging through a caring, welcoming and accepting community-oriented school environment.

## Authentic Classrooms

As Saints and Educators:

We believe in embracing innovation through a focus on technology and differentiated instruction to develop active learners prepared to succeed in today's world and the future. At St. Lawrence, students are able to access any one of three computer labs, classrooms with Smart Boards, or class sets of iPads, class set of laptops and Apple TVs.

# Specialist High Skill Majors at Saint Lawrence

St. Lawrence is proud to offer students the opportunity to take part in one of three Specialist High Skills Majors being offered next year. SHSMs are a customized package of senior courses, experiential learning and certification programs that allows a student to build a foundation of knowledge and skills in a particular area of interest. It allows students to refine career goals by taking part in “reach ahead” activities. Additional certifications relating to the SHSM will be offered, like CPR and First Aid, Service Excellence, Smart Serve and WHMIS. Students will then have an opportunity to complete a Cooperative Education experience in their chosen field. Upon completion of all the components, the student will receive a SHSM seal on his/her diploma, and a record of his/her achievement to share with potential employers. Our hospitality and physical education areas have recently undergone major upgrades allowing our staff and students the pleasure of working with state of the art equipment.

## Hospitality High Skills Major

Five tourism industries comprise the hospitality and tourism sector: accommodation, food and beverage services, recreation, and travel services. The tourism sector in Canada is a major source of employment. Tourism in Ontario is a dynamic, growing sector. The food service industry employs 374,000 people, with nearly 39 per cent of workers between the ages of 15 and 24 years old. The SHSM Hospitality and Tourism at Saint Lawrence enables students to build a foundation of sector-focused knowledge and skills before graduating and entering apprenticeship training, college, university, or an entry-level position in the workplace. The Saint Lawrence SHSM Hospitality and Tourism is designed to have an emphasis on hospitality, with integration of tourism components in Grade 12.

## Health and Wellness High Skills Major

The SHSM Health and Wellness program offers students the opportunity to explore topics and issues related to child care and family services, health care, leisure and recreation, and fitness, leadership and sports. A minimum 3% increase in jobs in these areas is expected in this area in the future. Present job and experiential learning opportunities are available in early childhood education, child and youth and other related counselling, medical, fitness and leisure and recreation sectors within the eastern Ontario area. The SHSM will provide valuable opportunities for students to focus their learning, obtain valuable sector related skills, achieve their diploma requirements, and support success in their future endeavours.

## Construction High Skills Major

The SHSM –Construction enables students to build a foundation of sector-focused knowledge and skills before entering apprenticeship training, college, university, or an entry-level position in the workplace. The Construction Specialist High Skills Major is an innovative, integrated Architectural Design and Building Construction program that allows the student to progress through the construction process from the design and drawing stage, to the actual construction of a variety of structures.

## THE CREST

The honey bee belonging to the Hymenoptera order of insects is noted for industry. Possessing this characteristic, students of St. Lawrence will be enlightened by the torch of learning. With this light, they will attain

academic achievement symbolized by the quill and book. With these tools, students will be more useful citizens of their country symbolized by the maple leaf. The golden heads of wheat remind students that the harvest is abundant if they will only glean through daily presentations of lessons and practical work.

The motto: "LABOR OMNIA VINCIT" means literally that "work conquers all things". The name of the school appears in both languages to signify that students of the two great peoples attend St. Lawrence. The predominating colours are royal blue and white. These are the official colours of the school. The accessory colours are red and gold. These colours become useful in colour combinations for school uniforms, pennants and crests. New and old students at St. Lawrence will also see in the armorial bearings the love and esteem which they retain for their Alma Mater.

## THE SCHOOL

École secondaire Saint-Laurent - Saint Lawrence High School was established in 1950, in the City of Cornwall, to meet a growing student population as well as respond to French-speaking students' needs. École secondaire Saint-Laurent - Saint Lawrence High was one of the first secondary schools in this province to offer curriculum where French as well as English was the language of instruction in both academic and Business and Commerce subjects.

With the closure of three private bilingual educational institutions in the city in the late 60's, the newly created Stormont, Dundas and Glengarry County Board of Education, inherited an accommodation problem at École secondaire Saint-Laurent - Saint Lawrence High School.

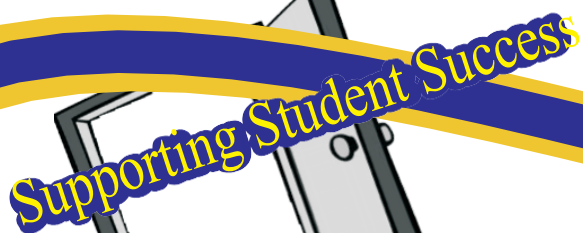

In order to alleviate overcrowding, on January 12, 1972 the Board approved a request to the Ministry that a fourth high school be built in the City of Cornwall.

Pending the completion of construction of the new school, a shift system, introduced as early as September 1970, was maintained wherein École secondaire Saint-Laurent - Saint Lawrence High School operated as the future French Language secondary school, La Citadelle.

On April 17, 1973, the Board approved the transfer of École secondaire Saint-Laurent - Saint Lawrence High School to the site of the present school and continued operation of La Citadelle at the former site.

Despite numerous transformations, Saint Lawrence continues to foster an environment of academic excellence and maintains the good spirits and valuable traditions established by the original school in 1

**Supporting Student Success**

# Opening doors of opportunity...

## *The Learning Commons*

The "Learning Commons" provides all students with opportunities to develop skills such as study, organizational, test-taking and note-taking; to receive remediation in specific subjects either by withdrawal from class at regular intervals or by appointment; and to receive individualized instruction in specific academic courses

## *Special Education Programs*

Saint Lawrence offers a variety of special education programs for students who have been identified as exceptional. Placement in these programs is made through an Identification, Placement and Review Committee (I.P.R.C.) which recommends that these students be admitted to these classes. The I.P.R.C. committee in consultation with the parents will devise an appropriate program geared to meet the student's special needs. The learning experiences required to meet these needs will be provided in the regular classroom, the Resource Room and/or in specialized classes. Available supports include: resource withdrawal, remedial services, flexible evaluation and assessment methods and any other services necessary to meet the individual student's needs as identified on the student's Individual Education Plan.

## *English as a Second Language (ELL) Resource Program*

Students who have recently arrived in Canada and for whom English is a second language may receive additional support. An instructor provides assistance during regular classes, resource periods and noon hour sessions. Students gain a better understanding of English as it is used in their regular courses.

## *Student Success Teacher (SST) Resource Program*

The learning experiences required to meet these needs will be provided in the regular classroom, the Student Success Teacher provides assistance during regular classes, resource periods and specialized classes. Students gain a better understanding to meet the individual students credit needs to achieve the skills and knowledge to graduate.

## PROVINCIAL LITERACY REQUIREMENT:

All students must pass the literacy requirement to graduate with an Ontario Secondary School Diploma (OSSD). The first way to meet this requirement is to pass the Ontario Secondary School Literacy Test (OSSLT) assessing students' reading and writing skills. This test is designed by the Ontario Education Quality and Accountability Office. All grade 10 students have the opportunity to take the test in the Fall or Spring of their grade 10 year. Accommodations may only be made for students with an Individual Education Plan (IEP) and in accordance with EQAO policies. Students may attempt the test in the Fall or Spring of the following year if they are unsuccessful their first time.

Students who were unsuccessful are eligible to take the Ontario Literacy Course OLC401. Upon successful completion of this course, the student will be deemed to have met the provincial literacy requirement for graduation.

## COMMUNITY INVOLVEMENT ACTIVITIES:

All students must complete a minimum of 40 hours of community involvement activities during their years in the secondary school program. These activities may take place in a variety of settings (e.g. not-for-profit organizations, hospitals, informal settings, etc.) outside of the school's normal instructional hours (e.g. lunch time, after school, weekends, or holidays). Students may not fulfill this requirement through activities that are counted towards a credit (e.g. cooperative education, LINK crew activities, work experience or community engagement linked to course work, etc.). The principal will decide whether a student has met the requirements of both the Ministry and the Board for these activities.

## ONTARIO SECONDARY SCHOOL DIPLOMA (OSSD)

AN ONTARIO SECONDARY SCHOOL DIPLOMA will be granted to a student who earns a minimum of 30 credits of 110 hours each, passes the Ontario School Secondary School Literacy Test, and completes the Community Involvement Requirement.

### CREDITS

#### Compulsory Credits (Total of 19)

4 credits in ENGLISH (one per grade)

1 credit in FRENCH AS A SECOND LANGUAGE

3 credits in MATHEMATICS (at least one in Grade Eleven or Twelve) 2 credits in SCIENCE

1 credit in CANADIAN HISTORY

1 credit in CANADIAN GEOGRAPHY

1 credit in PHYSICAL AND HEALTH EDUCATION

1 credit in ARTS

1 credit in TECHNOLOGICAL EDUCATION (Grade 9 or Grade 10)

1 credit in CIVICS AND CAREER STUDIES

1 ADDITIONAL credit in SCIENCE or TECHNOLOGICAL EDUCATION (Grades 9 to 12) or GUIDANCE or COOPERATIVE EDUCATION

1 ADDITIONAL credit in ENGLISH, or a LANGUAGE (French, Native, Classical) or SOCIAL SCIENCES AND THE HUMANITIES, or CANADIAN AND WORLD STUDIES

1 ADDITIONAL credit in MUSIC or ART or DRAMA or DANCE or BUSINESS STUDIES or PHYSICAL AND HEALTH EDUCATION or COOPERATIVE EDUCATION

#### Optional Credits (total of 11)

In addition to the 19 compulsory credits, students have to earn 11 optional credits in courses of their choice, selected from the full list of courses available in the school. Optional credits allow students to build an educational program that suits their individual interests and meets university, college, apprenticeship, or work requirements.

## ADDITIONAL PROGRAM OPTIONS

### COOPERATIVE EDUCATION

Cooperative Education offers students the opportunity to gain high school credits and investigate possible career options through on-the-job work experience. Students apply and practice the skills and knowledge acquired in their regular high school courses in a real-world work environment. Students may earn between one and four Cooperative Education credits in a semester. Students in the Coop Program may work towards an apprenticeship, as part of the Ontario Youth Apprenticeship Program (OYAP). Cooperative Education involves partnerships with the community. Students are monitored and supported by both the Coop Teacher and the Placement Supervisor with the goal of establishing a positive and successful experience for all parties. Students may enroll in the Coop Program more than once. For more information speak with a Guidance Counsellor or coop teacher.

### DUAL CREDITS

The Dual Credit program is a partnership between secondary schools and certain community colleges. Grade 12 students can apply to enroll in college courses or apprenticeship training, earning dual credits that count towards their OSSD and college diploma or apprenticeship certification. The college courses are taught at the college campus and high school students learn alongside their college peers. A Dual Credit student typically travels to the college once or twice a week for his or her two to three hour course. Transportation to the course is the responsibility of the student. The dual credit program is available through St. Lawrence College (Cornwall). Students who desire learning opportunities outside of high school and who would benefit from a college or apprenticeship experience are suitable candidates. For more information speak with a Guidance Counsellor.

### E-LEARNING

The Online Learning Program enables our students to access a variety of courses in a digital format. The program also provides an opportunity for students to acquire a new set of learning skills. Refer to pages 51 to 65 for available on-line for the 2024-2025 School Year.

## ONTARIO SECONDARY SCHOOL CERTIFICATE (OSSC)

### CREDITS

#### Compulsory Credits (Total of 7)

2 credits in ENGLISH

1 credit in MATHEMATICS

1 credit in SCIENCE

1 credit in CANADIAN GEOGRAPHY OR HISTORY

1 credit in PHYSICAL AND HEALTH EDUCATION

1 credit in ARTS OR TECHNOLOGY

#### Optional Credits (total of 7)

In addition to the 7 compulsory credits, students have to earn 7 optional credits in courses of their choice, selected from the full list of courses available in the school. Optional credits allow students to build an education program that suits their individual interests and meet apprenticeship or work requirements.

## ONTARIO CERTIFICATE OF ACCOMPLISHMENT

Student who are leaving secondary school upon reaching the age of 18 without having met the requirements for the OSSD or the OSSC may be granted a Certificate of Accomplishment. The Certificate of Accomplishment will be accompanied by the student's Ontario Student Transcript. For students who have an IEP, may be included.

## **SUBSTITUTION OF COMPULSORY CREDITS**

In order to allow flexibility in designing a student's program and to ensure that all students can qualify for the Secondary School Diploma, substitutions may be made for a limited number of compulsory credits. These courses must be selected from the course offerings of the school that meet the requirements for compulsory credits. To meet individual students' needs, the principal may replace up to three of these courses (or the equivalent in half courses) with courses that meet the compulsory credit requirements. Each substitution will be noted on the student's Ontario Student Transcript.

## **PRIOR LEARNING ASSESSMENT AND RECOGNITION**

Students enrolled in Ontario secondary schools may have their knowledge and skills evaluated against the expectations outlined in provincial policy documents in order to earn credits towards the secondary school diploma. This formal evaluation and accreditation process is known as Prior Learning Assessment and Recognition (PLAR). The "PLAR challenge process" refers to the process whereby students present evidence of prior learning for assessment. Students may proceed to a formal examination. Students may apply to a maximum of four credits through the challenge process and for no more than two credits in one subject area. Student may only challenge courses offered by the Upper Canada District School Board.

## **THE ONTARIO STUDENT TRANSCRIPT**

In all Ontario secondary schools as of September 1999, the Ontario Student Transcript contains:

- ® a student's record of courses successfully completed in Grades Nine and Ten
- ® all attempts at courses in Grade Eleven or Twelve including courses from which the student withdraws five days after the mid-term report.

This transcript is the official document a person must present whenever evidence of secondary education standing is required, e.g., for employment purposes or for admission to a post-secondary program.

## **THE ONTARIO STUDENT RECORD**

The Ontario Student Record (OSR) is the record of a student's educational progress through schools in Ontario. The Education Act requires that the principal of a school collect information "for inclusion in a record in respect of each pupil enrolled in the school and to establish, maintain, retain, transfer and dispose of the record". The act also regulates access to an OSR and states that the OSR is "privileged for the information and use of supervisory officers and the principal and teachers of the school for the improvement of instruction" of the student. Each student and the parent(s) of a student who is not an adult (that is, a student who is under the age of eighteen) must be made aware of the purpose and content of, and have access to, all of the information contained in the OSR.

# ASSESSMENT & EVALUATION OF STUDENT ACHIEVEMENT

## *Assessment and Evaluation*

The primary purpose of assessment and evaluation is to improve student learning. Student learning is assessed and evaluated according to the content standards outlined in the curriculum expectations provided in all curriculum documents for Grades 9–12, and according to the four categories of knowledge and skills and the four levels of achievement as outlined in the achievement chart. Students must successfully demonstrate achievement of all of the overall expectations to earn a credit for a course.

## *Assessment FOR Learning and Assessment AS Learning*

Assessment is the process of gathering information that accurately reflects how well a student is achieving the curriculum expectations in a subject or course. As part of Assessment *for* Learning, students will receive descriptive feedback and coaching for improvement prior to being evaluated.

## *Assessment OF Learning*

Assessment *OF* Learning (evaluation) refers to the process of judging the quality of student learning on the basis of established performance standards and assigning a value to represent the quality. Assessment *OF* Learning summarizes and communicates what the students know and can do with respect to the overall curriculum expectations for a particular subject or course.

## Reporting

Student achievement must be communicated formally to students and parents by means of the Provincial Report Card, Grades 9–12. The report card provides a record of the student’s achievement of the curriculum expectations in every course, at particular points in the school year or semester, in the form of a percentage grade. The percentage grade represents the quality of the student’s overall achievement of the expectations for the course and reflects the corresponding level of achievement as described in the achievement chart for the discipline. A final grade is recorded for every course, and a credit is granted and recorded for every course in which the student’s grade is 50 per cent or higher. The final grade for each course in Grades 9 to 12 will be determined as follows:

- Seventy per cent of the grade will be based on evaluations conducted throughout the course. This portion of the grade should reflect the student’s most consistent level of achievement throughout the course, although special consideration should be given to more recent evidence of achievement.
- Thirty per cent of the grade will be based on a final evaluation in the form of a performance examination, essay, and/or other method of evaluation suitable to the course content and administered towards the end of the course.

Percentage marks will be used to indicate achievement below 50 percent. For grades 7 to 10 a code “I” may be used on a student’s report card including the final report card to indicate that insufficient evidence is available to determine a percentage mark. For grades 9 and 10, a student who receives an “I” on the final report card to indicate insufficient evidence will not receive a credit for the course. For grades 11 and 12 an indicator of 20 means that there is insufficient evidence at this time for teachers to make a professional judgement with regards to achievement of the course expectations.

The Provincial Report Card, Grades 9–12, also includes anecdotal comments that focus on what students have learned, describe significant strengths, and identify next steps for improvement. The report card contains separate sections for recording attendance and for evaluating the student’s learning skills in each course. The evaluation of the learning skills and work habits, apart from any that may be included as part of a curriculum expectations, are not considered in the determination of the percentage marks for a subject or course. Report cards are issued twice per semester along with a progress report each semester.

Students who are carrying a minimum of 80% will be admitted to the Honour Roll during each report card period. A list of Honour Roll students may be published in alphabetical order in each school.

Students who are carrying a minimum of 75% will be admitted to the Principal List during each report card period. A list of Principal List students may be published in alphabetical order in each school.

The form is titled "Ontario Ministry of Education Provincial Report Card, Grades 9-12". It includes fields for Student, DSN, Gender, Home room, Semester, Reporting Period, and Date. The main table has columns for Courses, Reporting Period, and Learning Skills and Work Habits. The Learning Skills and Work Habits columns include: Responsibility, Organization, Initiative/Value, Understanding, and Self-Regulation. The Courses section includes fields for Course Title, Course Code, Teacher, and checkboxes for ESE, ELD, EP, and Final. The Comments section is titled "Strengths/Next Steps for Improvement". The Attendance section is on the right side of the table.

# COURSE LEVELS

Courses in grades 9 are offered at two levels: Locally Developed and De-streamed.

Locally Developed (L)
<ul style="list-style-type: none"><li>➤ designed to prepare students for grades 10-12 workplace level courses</li><li>➤ students in this stream will go directly to the workplace or apprenticeship programs after high school</li></ul>
De-streamed (D or W) - Grade 9
<ul style="list-style-type: none"><li>➤ develop students' knowledge and skills through the study of practical as well as abstract concepts - focus on essential components of a subject and explore related concepts, incorporating practical applications as appropriate</li><li>➤ students in this pathway may go to university, college or the workplace after high school</li></ul>

Courses in grade 10 are offered at four levels: Locally Developed, Open, Applied, and Academic

Locally Developed (L)
<ul style="list-style-type: none"><li>➤ designed to prepare students for grade 11 workplace level courses</li><li>➤ students in this stream will go directly to the workplace or apprenticeship programs after high school</li></ul>
Open (O)
<ul style="list-style-type: none"><li>➤ designed to broaden students' knowledge and skills in subjects that reflect their interests and to prepare them for active and rewarding participation in society</li><li>➤ • students following any pathway after high school may take these courses but these courses do not fulfill any prerequisite criteria to future pathways</li></ul>
Applied (P)
<ul style="list-style-type: none"><li>➤ focus on essential concepts of a subject and develop students' knowledge and skills through practical applications and concrete examples—familiar situations used to illustrate ideas—opportunities to experience hands-on applications of concepts and theories</li><li>➤ students in this stream may attend college or go directly to the workplace after high school but will not be eligible for university programs</li></ul>
Academic (D)
<ul style="list-style-type: none"><li>➤ develop students' knowledge and skills through the study of theory and abstract problems—focus on essential components of a subject and explore related concepts, incorporating practical applications as appropriate</li><li>➤ students in this pathway may go to university, college or the workplace after high school</li></ul>

Courses in grades 11 and 12 are offered at five levels: Workplace, Open, College, University/College, or University.

<b>Workplace (E)</b>
➤ designed to equip students with knowledge and skills they need to meet the expectations of employers if they plan to enter the workplace directly after graduation or the requirements for admission to certain apprenticeship or other training programs
<b>Open (O)</b>
➤ designed to broaden students' knowledge and skills in subjects that reflect their interests and to prepare them for active and rewarding participation in society (not designed with specific requirements of universities, colleges, or the workplace in mind)
<b>College (C)</b>
➤ designed to equip students with the knowledge and skills they need to meet the requirements for entrance to most college programs or for admission to apprenticeship or other training programs
<b>University/College (M)</b>
➤ designed to equip students with knowledge and skills to meet entrance requirements for specific programs offered at universities and colleges • may have specific prerequisites
<b>University (U)</b>
➤ designed to equip students with knowledge and skills to meet entrance requirements for university programs ➤ usually have specific prerequisites

UCDSB uses a six-digit alphanumeric code for courses. Here's a sample course code and its explanation:

CGC	1	W	F
-----	---	---	---

Geography, Grade 9 Academic French

Major Subject Area =	CGC
----------------------	-----

First three digits indicate the Ministry approved course title.

Grade/Language =	1
------------------	---

Fourth digit indicates the grade level.

Course Type =	W
---------------	---

Fifth digit indicates the course types.

Program or Credit differentiation =	F
-------------------------------------	---

Sixth digit indicates program or credit differentiation.

Please refer to the Secondary School Quick Reference Guide for further course code explanation

## Courses which will be scheduled at Saint Lawrence Secondary School are subject to sufficient student requests.

Course descriptions are available in the complete Course Calendar provided on the school website <http://slss.ucdsb.on.ca>.

Each course is worth a credit or the designated portion of a credit.

All the courses offered by Saint Lawrence Secondary School have been developed according to the requirements of the Ontario Ministry of Education. Detailed courses of study are available at the main office of each school and parents who wish to examine them may present their request to the Principal.

### Grade 9 Timetable

Compulsory Courses
English
French
Geography
Math
Physical Education
Science
Art
Technologies Education
Learning Strategies – Workplace Pathway
Business Studies – Workplace Pathway
Individual & Family Studies – Workplace Pathway

The subject area charts contained in the following pages, map out all the courses offered in the various disciplines in Grades 9 to 12 and show the links between courses and the possible prerequisites for them. It does not attempt to depict all possible movements from course to course.

# THE ARTS

## *Drama*

### **ADA30** Drama Open, Grade 11

This course requires students to engage in dramatic processes and the presentation of dramatic works, and emphasizes the application of drama skills in other contexts and opportunities. Students will interpret and present works in a variety of dramatic forms, create and script original works, and critically analyze the processes involved in producing dramatic works. Students will develop a variety of skills related to collaboration and the presentation of dramatic works.

Prerequisite: None

### **ADA3MO** Drama University/College Preparation Grade 11

This course requires students to create and perform in dramatic presentations. Students will analyze, interpret, and perform dramatic works from various cultures and time periods. Students will research various acting styles and conventions that could be used in their presentations, and analyze the functions of playwrights, directors, actors, designers, technicians, and audiences.

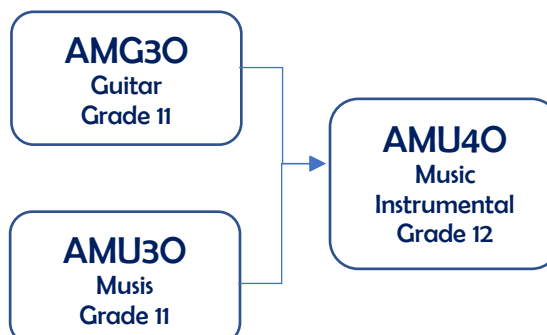

Prerequisite: Drama, Grade 9 or 10, Open

### **ADA4MO** Drama, University/College Preparation Grade 12

This course requires students to experiment individually and collaboratively with forms and conventions of both drama and theatre from various cultures and time periods. Students will interpret dramatic literature and other text and media sources while learning about various theories of directing and acting. Students will examine the significance of dramatic arts in various cultures, and will analyze how the knowledge and skills developed in drama are related to their personal skills, social awareness, and goals beyond secondary school. Prerequisite: Drama, Grade 11, University/College

Preparation: Grade 11 Open

## **MUSIC GUITAR & INSTRUMENTAL**

# GUITAR

**AMG3MO** Guitar Guitar, University/College Grade 11

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analyzing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

Prerequisite: Music, Grade 9 or 10, Open

# INSTRUMENTAL MUSIC

**AMU3M** Music Instrumental Music, University/College Preparation Grade 11

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analyzing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

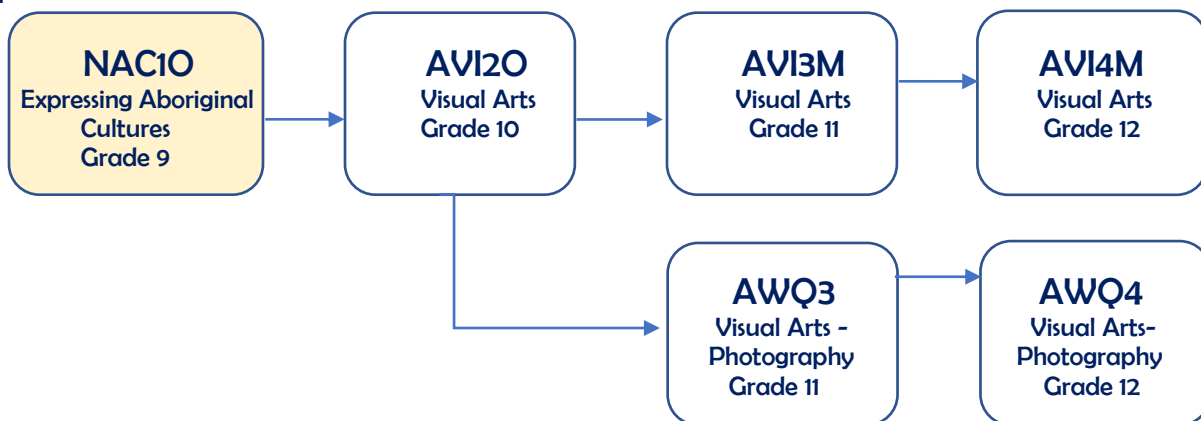

Prerequisite: Music, Grade 9 or 10, Open

**AMU4UO** Music Instrumental Music, University/College Preparation Grade 12

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyze how to apply skills developed in music to their life and careers.

Prerequisite: Music, Grade 11, University/College Preparation

# ART

**NAC10** Expressing Aboriginal Cultures, Grade 9

This course examines Aboriginal cultures in Canada through an exploration of art forms – painting, sculpture, storytelling, dance, and music – created by Aboriginal artists. Students will learn to identify Aboriginal art forms and describe relationships between the art forms and Aboriginal traditions, philosophy, and culture. Students will also create their own art forms to express their understanding of Aboriginal identity, relationships, and sovereignty.

Prerequisite: None

**AV120 Visual Arts, Grade 10**

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

**AV13M Visual Arts Grade 11**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emergent technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular artform (e.g. photography, video, computer graphics, information design).

Prerequisite: Visual Arts, Grade 9 or 10, Open

**AV14M Visual Arts Grade 12**

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

Prerequisite: Visual Arts, Grade 11, University/College Preparation

**AWQ3 Visual Arts – Photography Grade 11**

The course covers everything about how to use your camera and the historical beginnings of the medium. Learn to think like a photographer and photographically explore the world and cutting edge photography exhibitions. The course concludes with the creation of portrait and lighting imagery.

Prerequisite: Visual Arts Grade 9 or Visual Arts Grade 10, Open

**AWQ4 Visual Arts – Photography Grade 12**

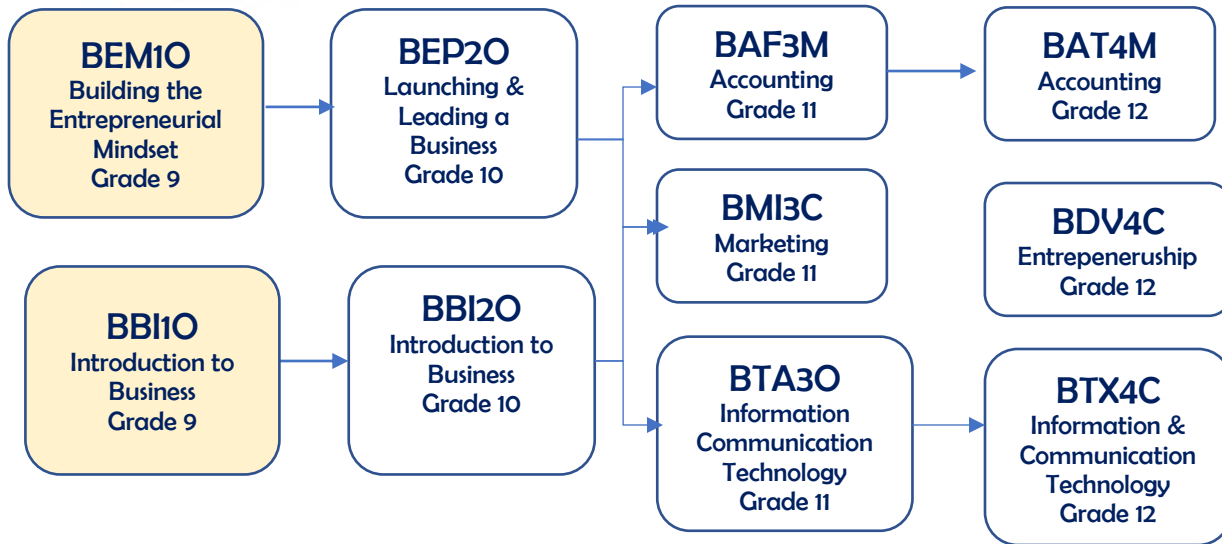

The course covers everything about how to use your camera and the historical beginnings of the medium. Learn to think like a photographer and photographically explore the world and cutting edge photography exhibitions. The course concludes with the creation of portrait and lighting imagery.

Prerequisite: Visual Arts – Photography Grade 11, University/College Preparation

# Business Studies

## **BBI1O** Introduction to Business, Grade 9

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

Prerequisite: None

## **BBI2O** Introduction to Business, Grade 10

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

Prerequisite: None

## **BDV4C** Entrepreneurship: Venture Planning in an Electronic Age, Grade 12

This course provides students with the opportunity to develop and apply entrepreneurial skills through the creation of a venture plan that capitalizes on the potential of e-commerce. Students will research and identify an opportunity for a venture. They will then complete the components of a venture plan that includes a website.

Prerequisite: None

## **BEM1O** Building the Entrepreneurial Mindset, Grade 9

In this course, students will learn what makes an entrepreneur thrive and the skills required to succeed in today's business environment. Students will begin to develop their own entrepreneurial mindset, and learn why it's important to take initiative, adapt to change, find creative solutions, and understand the financial considerations of entrepreneurship. This hands-on course will use business software and applications to help students plan and develop their entrepreneurial ideas and learn how to present them to a target audience. Throughout the course, students will enhance their communications skills as well as develop and refine their project management skills, including goal setting, time management, and networking.

Prerequisite: None

## **BEP2O** Launching & Leading a Business, Grade 10

This course introduces students to the world of business and what is required to be successful, ethical, and responsible in today's economy. Students will develop the knowledge and skills needed to be an entrepreneur who knows how to respond to local and global market opportunities. Throughout the course, students will explore and understand the responsibility of managing different functions of a business. This includes accounting, marketing, information and

communication technology, financial management, human resources, and production.

Prerequisite: None

**BAF3M** Introduction to Financial Accounting, University/College Preparation Grade 11

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and current issues and ethics in accounting.

Prerequisite: None

**BM3C** Marketing: Goods, Services, Events, College Preparation Grade 11

This course introduces the fundamental concepts of product marketing, which includes the marketing of goods, services, and events. Students will examine how trends, issues, global economic changes, and information technology influence consumer buying habits. Students will engage in marketing research, develop marketing strategies, and produce a marketing plan for a product of their choice.

Prerequisite: None

**BTA3O** Information Communication Technology University/College Preparation Grade 11

This course prepares students for the digital environment. Using a hands-on approach, students will further develop information and communication technology skills through the use of common business software applications. The concept and operation of e-business will be explored, and students will design and create an e-business website. The skills developed in this course will prepare students for success in the workplace and/or postsecondary studies.

Prerequisite: None

**BAT4M** Financial Accounting Principals, University/College Preparation Grade 12

This course introduces students to advanced accounting principles that will prepare them for postsecondary studies in business. Students will learn about financial statements for various forms of business ownership and how those statements are interpreted in making business decisions. This course further develops accounting methods for assets and introduces accounting for partnerships, corporations, and sources of financing.

Prerequisite: Accounting Fundamentals, Grade 11, University/College Preparation with a mark of 65%

**BTX4C** Information & Communication Technology Multimedia Solutions, College Grade 12

This course provides students with the opportunity to apply their information and communication technology skills while working in a team environment. Through a project-based approach, students will have opportunities to integrate common business software applications and apply multimedia techniques. Students will further develop their understanding of electronic business and e-commerce environments. The skills acquired in this course will prepare students for success in postsecondary studies and in their future careers.

Prerequisite: Information and Communication Technology: The Digital Environment, Grade 11

# CANADIAN AND WORLD STUDIES

## GEOGRAPHY

**CGC1W** Exploring Canadian Geography, De-streamed Grade 9  
This course builds on learning in Grades 7 and 8 in geography. Students will explore relationships within and between Canada's natural and human systems and how they interconnect with other parts of the world. Students will also examine environmental and economic issues, and their impact related to topics such as natural resources and industries, careers, land use and responsible development, and sustainability. In addition, students will understand the connections that diverse communities and individuals have with the physical environment and each other throughout Canada, including First Nations, Métis, and Inuit perspectives. Students will apply geographic thinking, use the geographic inquiry process, and use geospatial technologies throughout their investigations.

Prerequisite: None

**CGG30** Travel and Tourism: A Geographic Perspective, Open Grade 11  
This course focuses on issues related to travel and tourism within and between various regions of the world. Students will investigate unique environmental, sociocultural, economic, and political characteristics of selected world regions. They will explore travel patterns and trends as well as tensions related to tourism, and will predict future tourism destinations. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate the impact of the travel industry on natural environments and human communities.

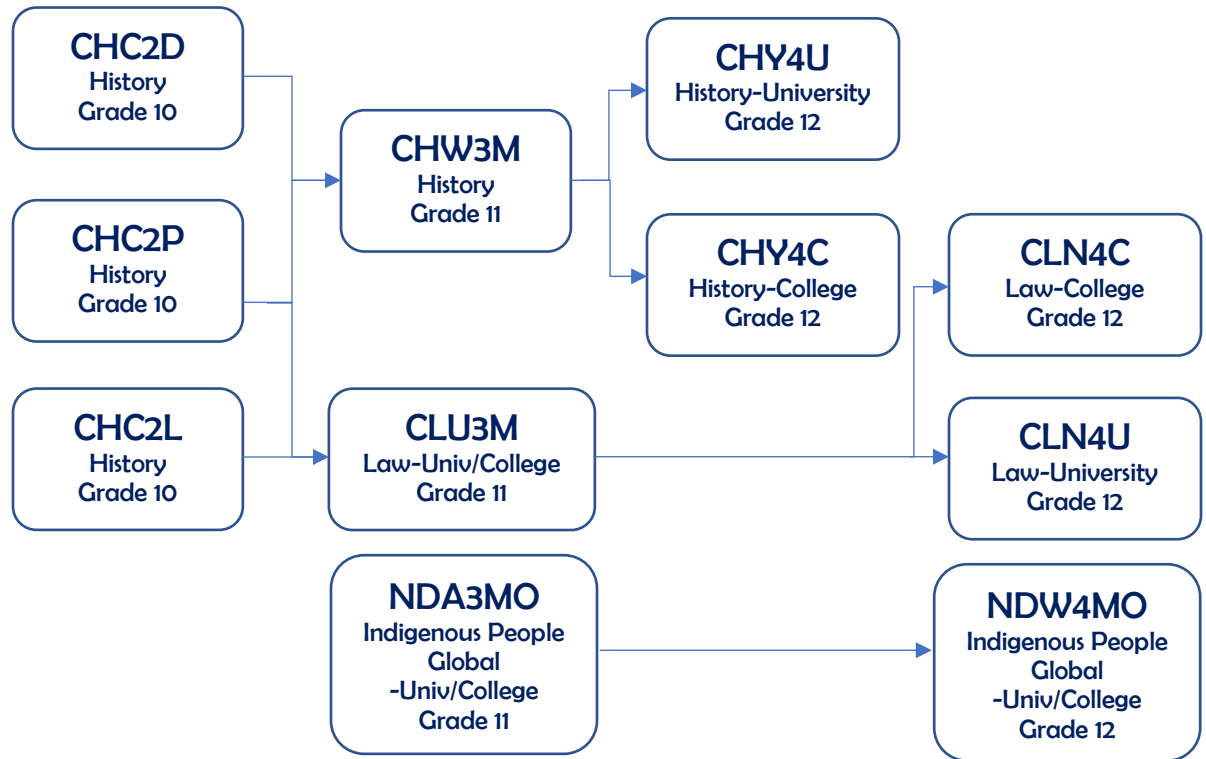

Prerequisite: Geography of Canada, Grade 9, De-streamed

## CIVICS

**CHV20/ CHV20F** Civic Grade 10

This course explores what it means to be an informed, participating citizen in a democratic society. Students will learn about the elements of democracy in local, national, and global contexts, about political reactions to social change, and about political decision-making processes in Canada. They will explore their own and others' ideas about civics questions and learn how to think critically about public issues and react responsibly to them.

# HISTORY

## CHC2DO/CHC2DF Canadian History since World War I, Academic Grade 10

This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

## CHC2PO Canadian History since World War I, Applied. Grade 10

This course focuses on the social context of historical developments and events and how they have affected the lives of people in Canada since 1914. Students will explore interactions between various communities in Canada as well as contributions of individuals and groups to Canadian heritage and identity. Students will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating the continuing relevance of historical developments and how they have helped shape communities in present-day Canada.

## CHC2L1 Canadian History in the Twentieth Century, Locally Developed Grade 10

This course focuses on the connections between the student and key people, events, and themes in Canadian history from World War I to the present. The major themes of Canadian identity, internal and external relationships, and changes since 1914, are explored through guided investigation. Students practise reading, writing, visual, and oral literacy skills, and mathematical literacy skills to identify and communicate ideas in a variety of forms.

## CHW3MO World History to the end of the 15<sup>th</sup> Century, University/College Preparation Grade 11

This course explores the history of various societies around the world, from earliest times to around 1500 CE. Students will examine life in and the legacy of various ancient and pre-modern societies throughout the world, including those in, Africa, Asia, Europe, and the Americas. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating social, political, and economic structures and historical forces at work in various societies and in different historical eras.

**Prerequisite:** CHC2D or CHC2P with a recommended mark of 65%

**CHY4UO** World History since the 15<sup>th</sup> Century, University Grade 12

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and assess societal progress or decline in world history.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

**CHY4CO** World History since the 15<sup>th</sup> Century, College Preparation Grade 12

This course explores key developments and events in world history since approximately 1450, with a focus on interactions within and between various regions. Students will examine social, economic, and political developments and how they have affected different peoples. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key turning points in world history and historical forces that have shaped our world.

Prerequisite: Any university, university/college, or college preparation course in Canadian and world studies, English, or social sciences and humanities. Recommend CHW3MO with a mark of 65%.

**NDA3MO** Issues of Indigenous Peoples in a Global Context, University/College Preparation Grade 11

This course examines historical and contemporary issues of concern to Indigenous peoples from a global perspective. Students will explore the richness, depth, and diversity of Indigenous cultures, traditions and knowledge. They will consider how diverse Indigenous communities persevere despite recent global environmental and economic trends. Topics such as identity, social justice, human rights and abuses, spirituality, resistance and protest for change will be investigated.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in Native studies

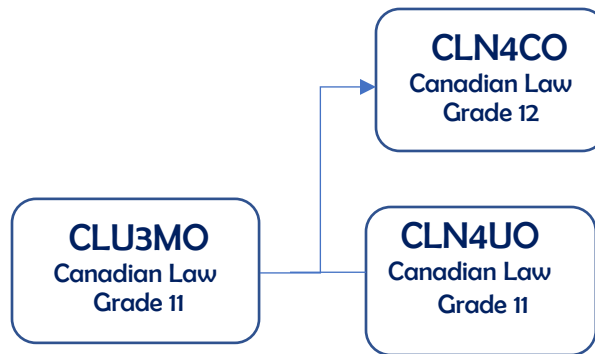

**NDW4MO** Issues of Peoples in a Global Context, Grade 12, University/College Preparation

This course provides students with an overview of the issues and challenges that confront indigenous peoples worldwide. Students will develop an understanding of the concerns and aspirations of the world's indigenous population, plan and conduct research on global issues that have an impact on indigenous peoples, and use information technology to consult materials related to the views of indigenous peoples throughout the world.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in Native studies

# LAW

## **CLU3MO Understanding Canadian Law, University/College Preparation Grade 11**

This course explores Canadian law, with a focus on legal issues that are relevant to the lives of people in Canada. Students will gain an understanding of rights and freedoms in Canada, our legal system, and family, contract, employment, tort, and criminal law. Students will use case studies and apply the concepts of legal thinking and the legal inquiry process to develop legal reasoning skills and to formulate and communicate informed.

Prerequisite: Canadian History in the Twentieth Century, Grade 10, Academic or Applied with a recommended mark of 65%.

## **CLN4CO Canadian and International Law, College Preparation Grade 12**

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop their understanding of the principles of Canadian and international law when exploring rights and freedoms within the context of topics such as religion, security, cyberspace, immigration, crimes against humanity, and environmental protection. Students will apply the concepts of legal thinking and the legal inquiry process when investigating these issues in both Canadian and international contexts, and they will develop legal reasoning skills and an understanding of conflict resolution in the area of international law.

Prerequisite: Understanding Canadian Law, Grade 11, with a recommended mark of 65%

## **CLN4UO Canadian and International Law, University Preparation Grade 12**

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop their understanding of the principles of Canadian and international law when exploring rights and freedoms within the context of topics such as religion, security, cyberspace, immigration, crimes against humanity, and environmental protection. Students will apply the concepts of legal thinking and the legal inquiry process when investigating these issues in both Canadian and international contexts, and they will develop legal reasoning skills and an understanding of conflict resolution in the area of international law.

Prerequisite: Understanding Canadian Law, Grade 11, with a recommended mark of 65%

# COMPUTER STUDIES

## ICS200 Introduction to Computer Studies, Open Grade 10

This course introduces students to computer programming. Students will plan and write simple computer programs by applying fundamental programming concepts, and learn to create clear and maintainable internal documentation. They will also learn to manage a computer by studying hardware configurations, software selection, operating system functions, networking, and safe computing practices. Students will also investigate the social impact of computer technologies, and develop an understanding of environmental and ethical issues related to the use of computers.

Prerequisite: None

## ICS3UO Introduction to Computer Science, University Grade 11

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development life-cycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields.

Prerequisite: None

## ICS3CO Introduction to Computer Programming, College Grade 11

This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project. Students will also learn about computer environments and systems, and explore environmental issues related to computers, safe computing practices, emerging technologies, and postsecondary opportunities in computer-related fields.

Prerequisite: None

## ICS4UO Computer Science, University Grade 12

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyze algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field.

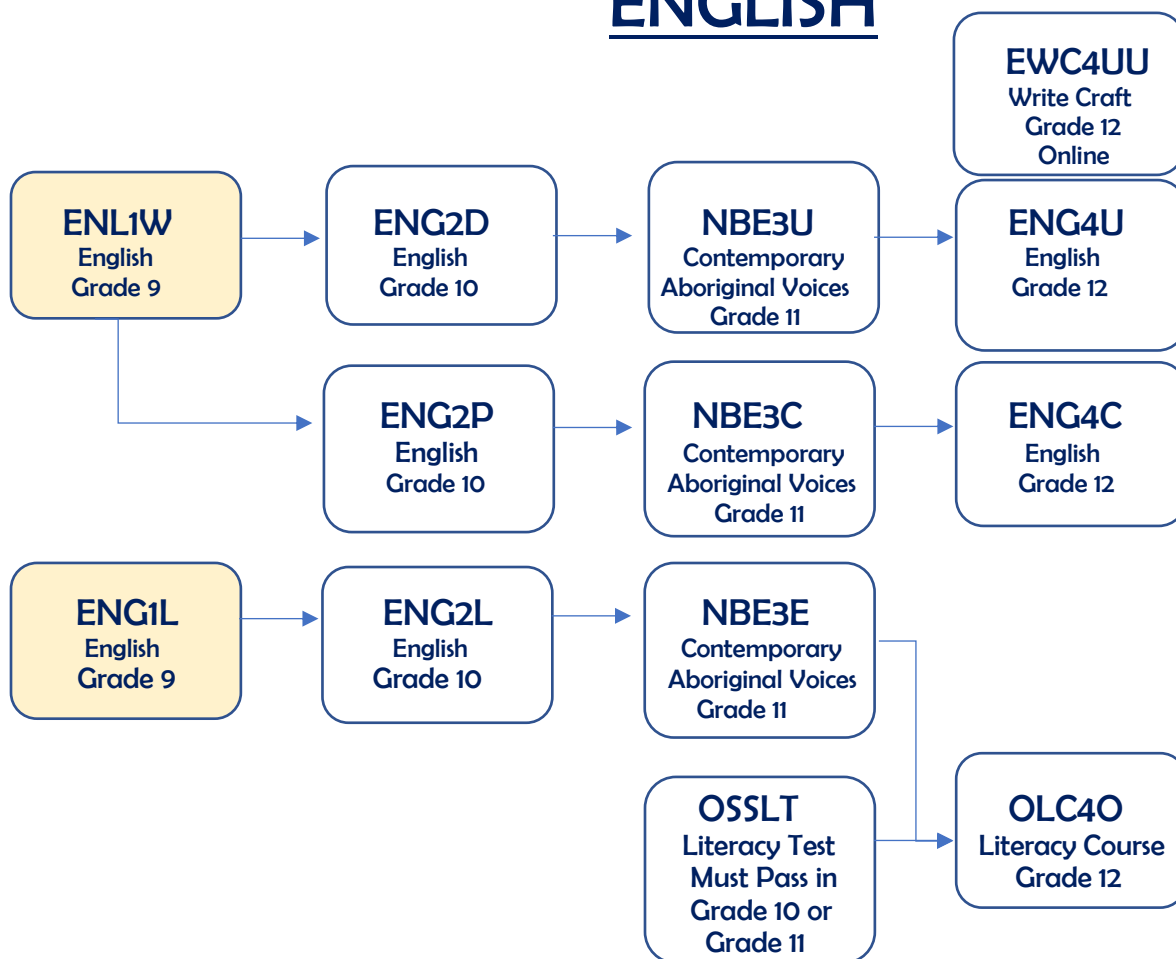

Prerequisite: Introduction to Computer Science, Grade 11, University Preparation

## ICS4CO Computer Programming, College Grade 12

This course further develops students' computer programming skills. Students will learn object oriented programming concepts, create object-oriented software solutions, and design graphical user interfaces. Student teams will plan and carry out a software development project using industry-standard programming tools and proper project management techniques. Students will also investigate ethical issues in computing and expand their understanding of environmental issues, emerging technologies, and computer-related careers.

Prerequisite: Introduction to Computer Programming, Grade 11, College Preparation

# ENGLISH

## COMPULSORY ENGLISH

**ENL1W** English, De-streamed Grade 9

This course is designed to develop the oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods; interpret informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on the use of strategies that contribute to effective communication. The course is intended to prepare students for the Grade 10 academic English course, which leads to university or college prep courses in grades 11 and 12.

Prerequisite: None

**ENG1L** English, Locally Developed Grade 9

This course emphasizes the key reading, writing, and oral communication and thinking skills students need for success in school and beyond. Students practice the skills necessary for clear and accurate spoken and written language. Course activities will develop confidence and self-esteem and provide motivation to succeed in school and life. This course is intended to prepare students for the Grade 10 locally developed English course, which leads to workplace prep courses in grades 11 and 12.

Prerequisite: Recommendation of teacher and IPRC Committee

**ENG2DO** English, Academic, Grade 10

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course.

Prerequisite: Grade 9, English, Academic ENG1DO or Grade 9, English, Applied ENG1PO

**ENG2PO English, Applied Grade 10**

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in secondary school and daily life. Students will study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course.

Prerequisite: Grade 9, English, Academic ENG1DO or Grade 9, English, Applied ENG1PO

**ENG2L1 English, Locally Developed Grade 10**

In this course, students focus on extending their literacy and communication skills to prepare for success in their daily lives, in the workplace, in the English Grade 11 Workplace Preparation course. The course is organized by strands that extend listening and talking skills, reading and viewing skills, and writing skills. In all strands, the focus is on refining foundational literacy skills and in using language clearly and accurately in a variety of authentic contexts. Students build on their strategies and engage in the processes involved in talking, listening, reading, viewing, writing, and thinking, and reflect regularly upon their growth in these areas.

Prerequisite: A Grade 9 English credit

**NBE3CO English: Contemporary Aboriginal Voices, College Grade 11**

This course emphasizes the development of literacy, critical thinking, and communication skills through the study of works in English by Aboriginal writers. Students will study the content, form, and style of informational texts and literary and media works, and will develop an appreciation of the wealth and complexity of Aboriginal writing. Students will also write reports, correspondence, and persuasive essays and analyse the relationship between media forms and audiences. An important focus will be on establishing appropriate voice and using business and technical language with precision and clarity.

Prerequisite: Grade 10 English, Academic or Applied

**NBE3EO English: Contemporary Aboriginal Voices, Workplace Grade 11**

This course emphasizes the development of literacy, critical thinking, and communication skills through the study of works in English by Aboriginal writers. Students will study the content, form, and style of informational texts and literary and media works, and will develop an appreciation of the wealth and complexity of Aboriginal writing. Students will also write explanations, letters, and reports and will investigate the connections between media forms and audiences. An important focus will be on using language clearly, accurately, and effectively in a variety of contexts.

Prerequisite: Grade 10 English, Academic or Applied

**NBE3UO English, University Preparation Grade 11**

This course emphasizes consolidation of literacy, critical thinking, and communication skills. Students will analyse a range of challenging texts from various time periods, countries, and cultures; write analytical and argumentative essays and a major paper for an independent literary research project; and apply key concepts to analyse media works. An important focus will be on understanding academic language and using it coherently and confidently in discussion and argument.

Prerequisite: English, Grade 10, University Preparation with a recommended mark of 65%

**ENG4UO English, University Preparation Grade 12**

This course emphasizes consolidation of literacy, critical thinking, and communication skills. Students will analyse a range of challenging texts from various time periods, countries, and cultures; write analytical and argumentative essays and a major paper for an independent literary research project; and apply key concepts to analyse media works. An important focus will be on understanding academic language and using it coherently and confidently in discussion and argument.

Prerequisite: English, Grade 11, University Preparation with a recommended mark of 65%

**ENG4CO English, College Preparation Grade 12**

This course emphasizes consolidation of literacy, critical thinking, and communication skills. Students will analyse informational texts and literary works from various time periods, countries, and cultures; write research reports, summaries, and short analytical essays; complete an independent study project; and analyse the interactions among media forms, audiences, and media industry practices. An important focus will be on establishing appropriate style and using business and technical language effectively.

Prerequisite: English, Grade 11, College Preparation with a recommended mark of 65%

## OPTIONAL ENGLISH COURSES

### OLC400 Ontario Secondary School Literacy Course, Open Grade 12

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

## ENGLISH AS A SECOND LANGUAGE

### ESLA00 English as a Second Language, Level 1, Open

This course builds on students' previous education and language knowledge to introduce the English language and help students adjust to their new cultural environment. Students will use beginning English language skills in listening, speaking, reading, and writing for everyday and essential academic purposes; use basic English language structures and simple sentence patterns in short conversations; read short adapted texts; and write phrases and short sentences. The course also provides students with the knowledge and skills they need to begin to adapt to their new lives in Canada.

### ESLB00 English as a Second Language, Level 2, Open

This course expands students' listening, speaking, reading, and writing skills in English for everyday and academic purposes. Students will participate in conversations, in structured situations, on a variety of familiar and new topics; link English sentences to compose paragraphs; read a variety of texts designed or adapted for English language learners; and expand their knowledge of English grammatical structures and sentence patterns. The course also supports students' continuing adaptation to the Ontario school system by expanding their cultural knowledge of their new province and country.

Prerequisite: English as a Second Language, Level 1, or equivalent

### ESLCO0 English as a Second Language, Level 3, Open

This course extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will make short classroom presentations; read a variety of adapted and original texts in English; and write using a variety of forms of text. Students will also expand their academic vocabulary and their study skills to facilitate the transition to the mainstream school program. This course also introduces students to the rights and responsibilities inherent in Canadian citizenship, and to a variety of current Canadian issues.

Prerequisite: English as a Second Language, Level 2, or equivalent

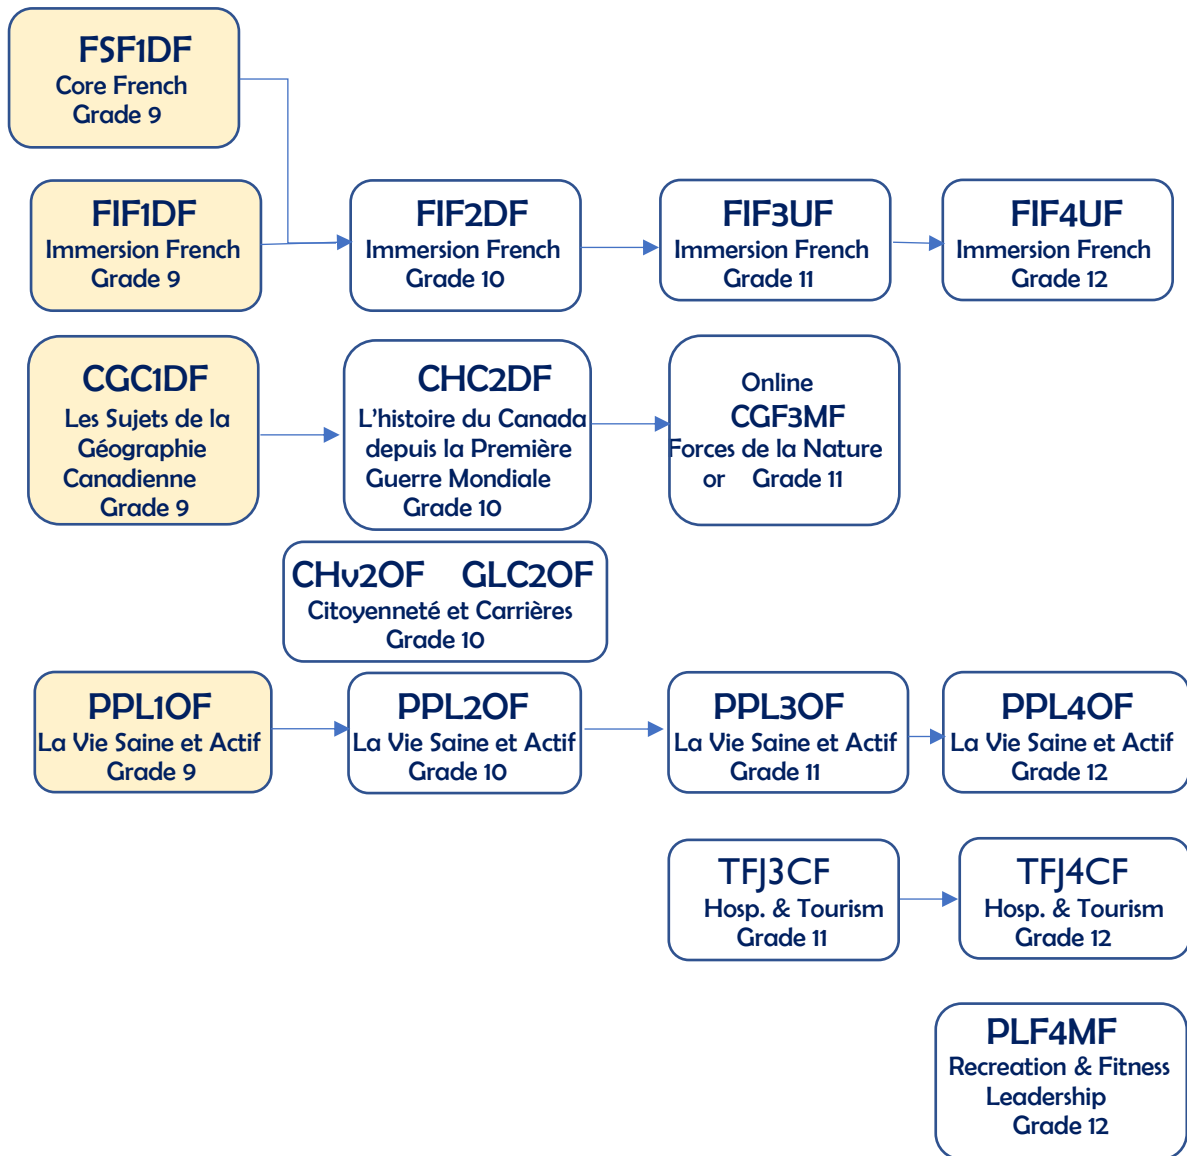

### ESLDO0 English as a Second Language, Level 4, Open

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations and to participate in Canadian society as informed citizens. Students will develop the reading, writing, and oral presentation skills required for success in all school subjects. They will study and interpret a variety of grade-level texts; extend listening and speaking skills through participation in discussions and seminars; write narratives, articles, and summaries in English; and respond critically to various print and media texts.

Prerequisite: English as a Second Language, Level 3, or equivalent

# FRENCH

## **FSF1DF** Core French, De-streamed Grade 9

This course provides opportunities for students to communicate and interact in French with increasing independence, with a focus on familiar topics related to their daily lives. Students will develop their skills in listening, speaking, reading, and writing by using language learning strategies introduced in the elementary Core French program, and will apply creative and critical thinking skills in various ways. They will also enhance their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: Minimum of 600 hours of elementary Core French instruction, or equivalent

## **FIF2DF** French Immersion, Academic Grade 10

This course enables students to increase their knowledge of the French language and to further develop their language skills through the study of twentieth-century European francophone literature and culture. Students will participate in oral communication, reading, and writing activities based on a variety of French literary and media works. They will study at least one novel and a selection of poems, short stories, films, plays, and newspaper and magazine articles.

Prerequisite: Grade 9, French Immersion, Academic (FIF1DF)

**FIF3UF** French Immersion, University Preparation Grade 11,

This course develops knowledge and language skills through the study of francophone literature and culture from around the world. Students will study novels, plays, poems, short stories, films, and non-fiction works and produce written assignments in a variety of forms, including critiques and *précis*. They will also write a formal research essay. The use of correct grammar and appropriate language conventions in both spoken and written French will be emphasized throughout the course.

Prerequisite: French Immersion, Grade 10, Academic

**FIF4UF** French Immersion, University Preparation Grade 12

This course provides for extensive study of French literature and culture from the Middle Ages to the present. Students will study novels, plays, poems, films, and non-fiction works produced in various historical periods, and will write a formal research paper. The use of correct grammar and appropriate language conventions in both spoken and written French will be emphasized throughout the course.

**CHC2DF** French Immersion Canadian History, Grade 10 (Same as CHC2D – this course is taught in French.)

This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

Prerequisite: French Immersion

**CHV2OF** French Immersion Civic & Careers Grade 10 (Same as CHV2O – this course is taught in French.)

This course explores what it means to be an informed, participating citizen in a democratic society. Students will learn about the elements of democracy in local, national, and global contexts, about political reactions to social change, and about political decision-making processes in Canada. They will explore their own and others' ideas about civics questions and learn how to think critically about public issues and react responsibly to them.

Prerequisite: French Immersion

**PPL1OF**

**PPL2OF**

**PPL3OF**

**PPL4OF** French Immersion Healthy Active Living Education, (Same as PPL10/PPL20/PPL30/PPL40 – this is a co-ed class and the course is taught in French.)

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own wellbeing is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively

Prerequisite: French Immersion

**TFJ3CF & TFJ4CF** French Immersion Culinary Arts and Management, College Preparation, Grade 11 & Grade 12 (Same as TFJ3C or TFJ4C – this is course is taught in French)

This course enables students to develop or expand knowledge and skills related to hospitality, with an emphasis on basic food preparation. Students will learn about preparing and presenting food, evaluating facilities, controlling inventory, and marketing and managing events and activities, and will investigate customer service principles and the cultural and economic forces that drive tourism trends. Students will develop an awareness of health and safety standards, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: French Immersion

# GUIDANCE AND CAREER EDUCATION

**GLS100**                    Learning Strategies 1: Skills for Success in Secondary School, Open Grade 9 and 10  
This course focuses on learning strategies to help students become better, more independent learners. Students will learn how to develop and apply literacy and numeracy skills, personal management skills, and interpersonal and teamwork skills to improve their learning and achievement in school, the workplace, and the community. The course helps students build confidence and motivation to pursue opportunities for success in secondary school and beyond.  
Prerequisite: For GLS10 – None For GLE10 and GLE20 – Recommendation of principal

**GLC20**                    Careers Studies OPEN GRADE 10  
This course gives students the opportunity to develop the skills, knowledge, and habits that will support them in their education and career/life planning. Students will learn about global work trends, and seek opportunities within the school and community to expand and strengthen their transferable skills and their ability to adapt to the changing world of work. On the basis of exploration, reflective practice, and decision-making processes, students will make connections between their skills, interests, and values and their postsecondary options, whether in apprenticeship training, college, community living, university, or the workplace. They will set goals and create a plan for their first postsecondary year. As part of their preparation for the future, they will learn about personal financial management – including the variety of saving and borrowing tools available to them and how to use them to their advantage – and develop a budget for their first year after secondary school.  
Prerequisite: None

**GWL30**                    Designing Your Future, Open Grade 11  
This course prepares students to make successful transitions to postsecondary destinations as they investigate specific postsecondary options based on their skills, interests, and personal characteristics. Students will explore the realities and opportunities of the workplace and examine factors that affect success, while refining their job-search and employability skills. Students will develop their portfolios with a focus on their targeted destination and develop an action plan for future success.  
Prerequisite: None

**GLN40**                    Navigating the Workplace, Open Grade 12  
This course provides students with opportunities to develop the workplace essential skills and work habits required for success in all types of workplaces. Students will explore occupations and careers of interest through participation in real workplace experiences. They will make plans for continued learning and work, work with others to design learning experiences, and investigate the resources and support required to make a smooth transition to their postsecondary destination.  
Prerequisite: None

**GLS40**                    Advanced Learning Strategies: Skills for Success After Secondary School, Open Grade 12  
This course improves students' learning and personal-management skills, preparing them to make successful transitions to work, training, and/or postsecondary education destinations. Students will assess their learning abilities and use literacy, numeracy, and research skills and personal-management techniques to maximize their learning. Students will investigate trends and resources to support their postsecondary employment, training, and/or education choices and develop a plan to help them meet their learning and career goals.  
Prerequisite: For GLS40 – None

# INTERDISCIPLINARY STUDIES

## IDC4O Interdisciplinary Studies, Grade 12,

This course emphasizes the development of practical skills and knowledge to solve problems, make decisions, create personal meaning, and present findings beyond the scope of a single subject or discipline. Through individual and collaborative inquiry and research into contemporary issues, real-life situations, and careers, students will apply the principles and skills derived from the complementary subjects and disciplines studied, evaluate the reliability of information, and examine how information technology can be used safely, effectively, and legally. They will also learn how to select strategies to define problems, research alternative solutions, assess their thinking in reaching decisions, and adapt to change as they acquire new knowledge.

## IDC4UO Environmental Leadership, University/College, Grade 12

This course combines the expectations for Interdisciplinary Studies, Grade 12, Open with selected expectations from the two courses, PLF 4C (Recreation and Fitness Leadership, Grade 12) and SVN 3M (Environmental Science Grade 11). Students will use scientific investigation techniques to explore sustainable and affordable agricultural opportunities for urban settings. They will investigate but not be limited to, appropriate plant selection for growing season and space restrictions, the role that modern agricultural practices' play within the context of urban farming; the positive and negative impact that urban farming can have on the economy (both locally and globally). Students will form community partnerships to help develop and sustain urban farming within the local community. Students will develop and applied individual and group leadership skills in the context of both the classroom environment and the local communities. This will include leadership opportunity within the context of the School, Family of Schools and various community organizations. Students will investigate how urban farming and gardening can enhance their physical well-being.

# COOPERATIVE EDUCATION PROGRAM

The Cooperative Education Program is available to students in Grades 10, 11 and 12, and is based on a related course (or courses) from an Ontario curriculum policy document or a Ministry-approved, locally-developed course. The student must be concurrently enrolled in the related course, or have successfully completed it. The Co-operative Education Program includes a classroom component. Work placements provide students with opportunities to apply and extend their knowledge, and practice and reflect current workplace practices and standards. The student's Personal Placement Learning Plan will be designed following a placement interview. Some students will be eligible to begin an apprenticeship program through a Cooperative Education placement in a skilled trades setting. Some students will select Cooperative Education placements which will prepare them for the school-to-work transition.

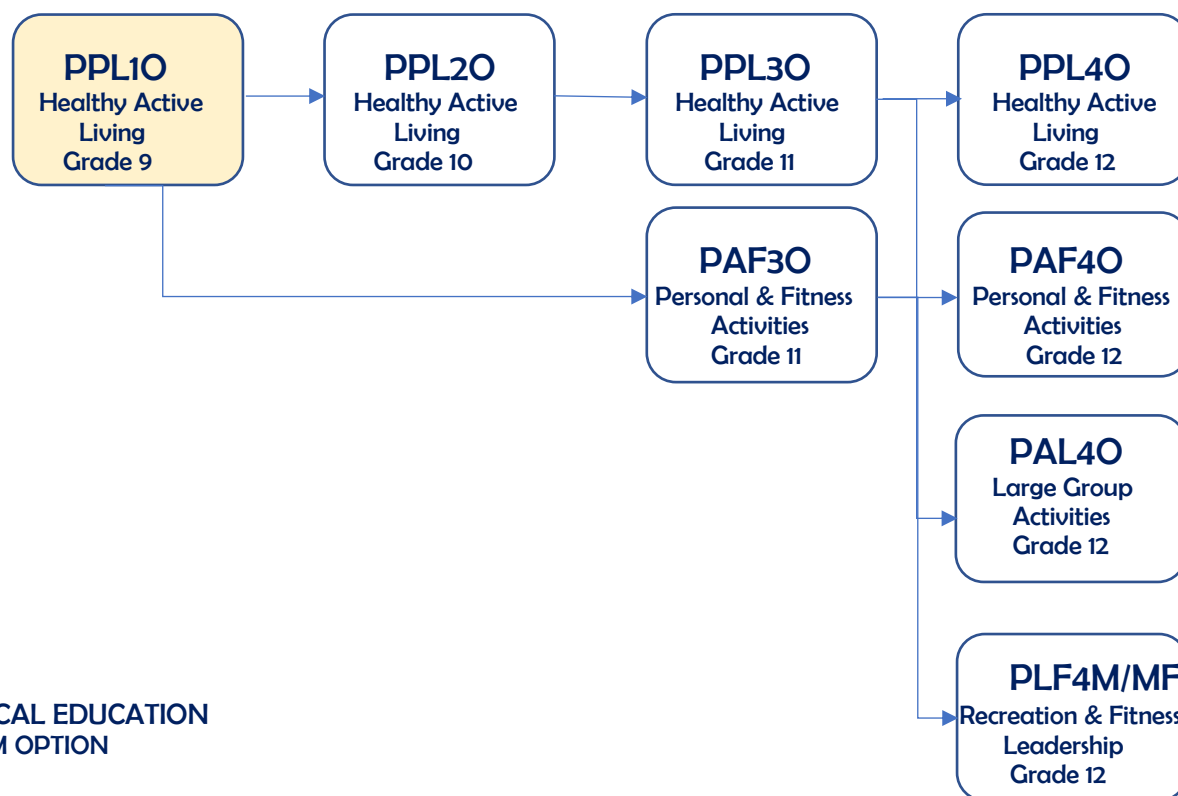

## COOP32/42/44 Grade 11, Cooperative

This course is available to students in grades 11 and 12 and is based on a related course (or courses) from an Ontario curriculum policy document or a Ministry approved locally developed course. The student must be concurrently enrolled in the related course or have successfully completed it. Cooperative education courses include a classroom component and a placement component. Placements provide students with opportunities to apply and extend the knowledge, and practice and refine the skills, acquired in the related course, and to demonstrate the achievement of placement expectations that reflect current workplace practices and standards. The student's individual cooperative education program will be designed following a placement interview and can be worth two, three or four credits. Some students will be eligible to begin an apprenticeship through a cooperative education placement in a skilled trades setting. Some students will select cooperative education placements which prepare them for the school to work transition.

Prerequisite: Career Studies, Grade 10, Open

PATHWAYS TO THE  
WORLD OF WORK  
FOR YOUNG ADULTS

# HEALTH & PHYSICAL EDUCATION

## PHYSICAL EDUCATION SHSM OPTION

### PPL10 Healthy Active Living Education, Grade 9

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own wellbeing is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively. Prerequisite: None

### PPL200 Healthy Active Living Education, Open Grade 10

This course emphasizes regular participation in a variety of enjoyable physical activities that promote lifelong healthy active living. Student learning will include the application of movement principles to refine skills; participation in a variety of activities that enhance personal competence, fitness, and health; examination of issues related to healthy sexuality, healthy eating, substance use and abuse; and the use of informed decision-making, conflict resolution, and social skills in making personal choices.

### PPL300 Healthy Active Living Education, Open, Grade 11

This course focuses on the development of a healthy lifestyle and participation in a variety of enjoyable physical activities that have the potential to engage students' interest throughout their lives. Students will be encouraged to develop personal competence in a variety of movement skills and will be given opportunity to practice goalsetting, decision-making, social, and interpersonal skills. Students will also study the components of healthy relationships, reproductive health, mental health, and personal safety.

Prerequisite: None

**PAF300**

**Healthy Active Living Education - Personal and Fitness Activities, Open Grade 11**

This course focuses on the development of a healthy lifestyle and participation in a variety of enjoyable personal fitness activities that have the potential to engage students' interest throughout their lives. Students will be encouraged to develop personal competence in a variety of movement skills and will be given opportunities to practice goal-setting, decision-making, social, and interpersonal skills. Students will also study the components of healthy relationships, reproductive health, mental health, and personal safety.

Prerequisite: None

**PPL400**

**Healthy Active Living Education, Open Grade 12**

This course focuses on the development of a personalized approach to healthy active living through participation in a variety of sports and recreational activities that have the potential to engage students' interest throughout their lives. Students will develop and implement personal physical fitness plans. In addition, they will be given opportunities to refine their decision-making, conflict-resolution, and interpersonal skills, with a view to enhancing their mental health and their relationships with others.

Prerequisite: None

**PAL40**

**Healthy Living and Large-Group Activities, Grade 12**

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

**PLF4MO/MF**

**Recreation and Fitness Leadership, College Preparation Grade 12**

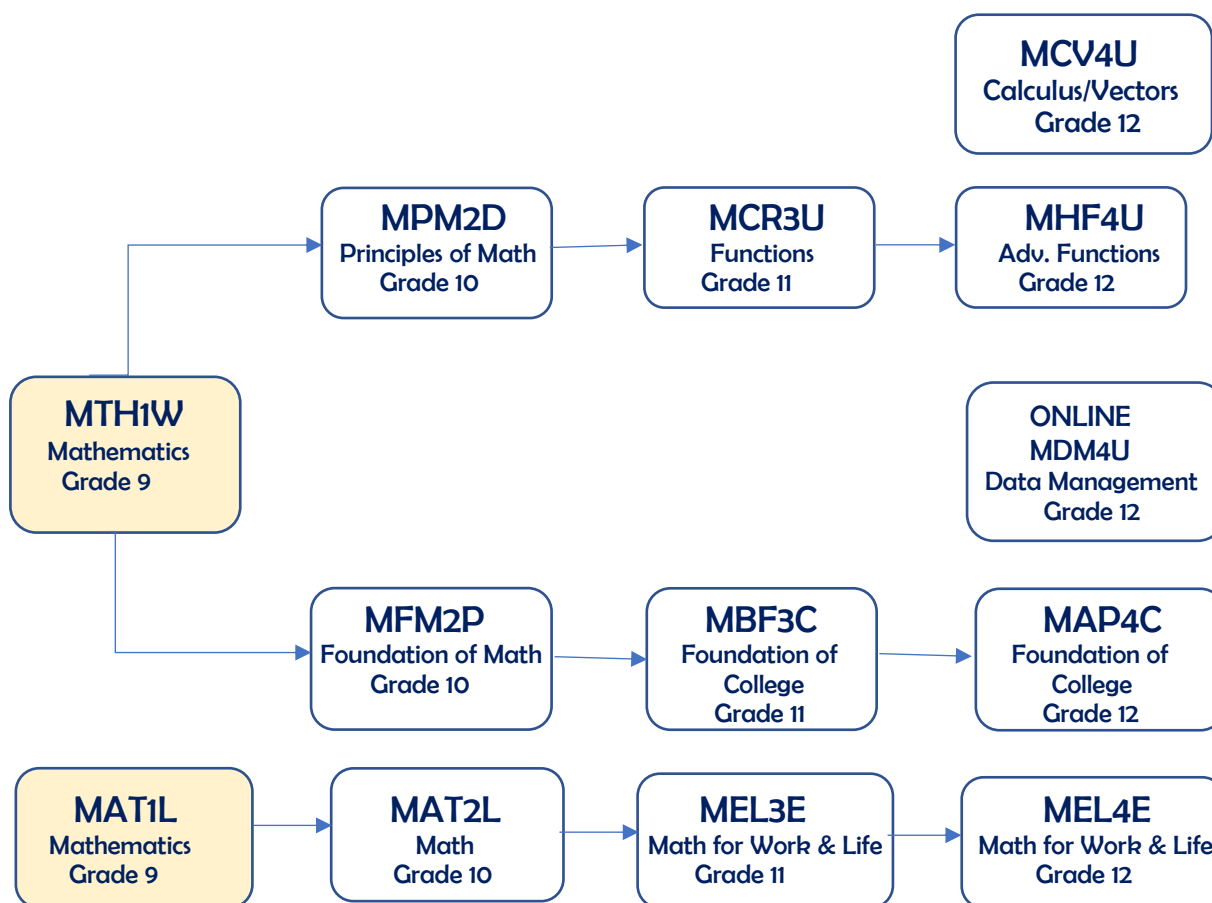

This course focuses on the development of leadership and coordination skills related to recreational activities. Students will acquire the knowledge and skills required to plan, organize, and implement recreational events. They will also learn how to promote the value of physical fitness, personal well-being, and personal safety to others through mentoring. The course will prepare students for college programs in recreational, leisure, and fitness leadership.

Prerequisite: Any Grade 11 or 12 open course in health and physical education with a recommended mark of 70%.

Students should have demonstrated leadership potential.

# MATHEMATICS

## **MTH1W Mathematics, Grade 9**

This course enables students to consolidate, and continue to develop, an understanding of mathematical concepts related to number sense and operations, algebra, measurement, geometry, data, probability, and financial literacy. Students will use mathematical processes, mathematical modelling, and coding to make sense of the mathematics they are learning and to apply their understanding to culturally responsive and relevant real-world situations. Students will continue to enhance their mathematical reasoning skills, including proportional reasoning, spatial reasoning, and algebraic reasoning, as they solve problems and communicate their thinking.

Prerequisite: None

## **MAT1L Mathematics, Grade 9**

Locally Developed Concepts will be presented in a real life context, providing students with the opportunity to explore, organize, interpret, and use mathematical models to solve problems. Technology and manipulatives will be used wherever appropriate. This course is intended to prepare students for the grade 10 locally developed Mathematics course, which leads to workplace prep courses in grades 11 and 12.

Prerequisite: Recommendation of the teacher and IPRC Committee

## **MPM2DO Principles of Mathematics, Academic Grade 10**

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relationships and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multistep problems and communicate their thinking.

Prerequisite: Grade 9 Foundations of Mathematics, MTH1W or MAT1L

**MFM2PO Foundations of Mathematics, Applied Grade 10**

This course enables students to consolidate their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic relationships. Students will investigate similar triangles, the trigonometry of right-angled triangles, and the measurement of three-dimensional objects. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: Foundations of Mathematics, Grade 9, Applied (MFM1PO) or Principles of Mathematics, Grade 9, Academic (MPM1DO)

**MAT2L1 Mathematics, Locally Developed Grade 10**

This course emphasizes the extension of mathematical knowledge and skills to prepare students for success in their everyday lives, in the workplace, and in the Mathematics Grade 11 and Grade 12 Workplace Preparation courses. The course is organized by three strands related to money sense, measurement, and proportional reasoning. In all strands, the focus is on strengthening and extending key foundational mathematical concepts and skills by solving authentic, everyday problems. Students have opportunities to extend their mathematical literacy and problem-solving skills and to continue developing their skills in reading, writing, and oral language through relevant and practical math activities.

Prerequisite: A Grade 9 Mathematics credit

**MCR3UO Functions, University Preparation Grade 11**

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; and develop facility in simplifying polynomial and rational expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: Principles of Mathematics, Grade 10, Academic with a recommended mark of 65%

**MCF3MO Functions and Applications, University/College Preparation Grade 11**

This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modelling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to financial and trigonometric applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: Principles of Mathematics, Grade 10, Academic, or Foundations of Mathematics, Grade 10, Applied with a recommended mark of 70%

**MBF3CO Foundations for College Mathematics, College Preparation Grade 11**

This course enables students to broaden their understanding of mathematics as a problem-solving tool in the real world. Students will extend their understanding of quadratic relations, as well as of measurement and geometry; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; and develop their ability to reason by collecting, analysing, and evaluating data involving one and two variables. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: Foundations of Mathematics, Grade 10, Applied with a recommended mark of 65% Principles of Mathematics, Grade 10, Academic.

**MEL3EO Mathematics for Everyday Life, Workplace Preparation Grade 11**

This course enables students to broaden their understanding of mathematics as it is applied in important areas of day-to-day living. Students will solve problems associated with earning money, paying taxes, and making purchases; apply calculations of simple and compound interest in saving, investing, and borrowing; and calculate the costs of transportation and travel in a variety of situations.

Prerequisite: Mathematics, Grade 9, Academic or Applied

**MCV4UO**                      Calculus and Vectors, University Preparation Grade 12

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors, and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, rational, exponential, and sinusoidal functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who plan to study mathematics in university and who may choose to pursue careers in fields such as physics and engineering.

Prerequisite or Co-requisite: Advanced Functions, Grade 12, University Preparation

**MHF4UO**                      Advanced Functions, University Preparation Grade 12

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students who plan to study mathematics in university and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

Prerequisite: Functions, Grade 11, University Preparation, or  
Mathematics for College Technology, Grade 12, College Preparation

**MDM4UO**                      Data Management, University Preparation Grade 12 **ONLINE ONLY**

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing large amounts of information; solve problems involving probability and statistics; and carry out a culminating project that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.

Prerequisite: Functions and Applications, Grade 11, University/College Preparation, or Functions, Grade 11, University Preparation

**MAP4CO**                      Foundations for College Mathematics, College Preparation Grade 12

This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyse data using statistical methods; solve problems involving applications of geometry and trigonometry; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades.

Prerequisite: Foundations for College Mathematics, Grade 11, College Preparation

**MEL4EO**                      Mathematics for Work and Everyday Life, Workplace Preparation Grade 12

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will use statistics in investigation questions; apply the concept of probability to solve problems in familiar situations; investigate accommodation costs and create household budgets; use proportional reasoning; estimate and measure; and apply geometric concepts to create designs. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: Mathematics for Work and Everyday Life, Grade 11, workplace Preparation

# INDIGENOUS STUDIES

## **NAC100** Expressing Aboriginal Cultures, Open Grade 9

This course will explore a variety of contemporary and traditional First Nations, Métis, and Inuit art forms such as new media, storytelling, installation and performance art. Students will examine the interrelationships between Aboriginal art forms and individual and cultural identities and values. They will create art works to express their own ideas and understanding of Aboriginal identity, relationships, and sovereignty by using a range of media, processes, techniques, and styles.

## **NBE3CO** English: Contemporary Aboriginal Voices, College Preparation Grade 11

This course focuses on themes, forms, and styles of literary, informational, and graphic texts of First Nation, Métis, and Inuit authors in Canada. They will study changes in use of text forms by Aboriginal authors over time when expressing themes of identity, relationships, and sovereignty in the 21st century. Students will create oral, written, and media texts to explore their own ideas and understanding focusing on the development of literacy, communication, critical and creative thinking skills necessary for success in practical and academic life. The course is intended to prepare students for the compulsory Grade 12 college preparation course.

Prerequisite: Grade 10 English, Academic or Applied

## **NBE3EO** English: Contemporary Aboriginal Voices, Workplace Preparation Grade 11

This course focuses on content, forms, and style of literary, informational, and graphic texts of First Nation, Métis, and Inuit authors in Canada. They will investigate the connections between text forms and audiences on themes such as identity, culture, community, relationships, and sovereignty in the 21st century. Students will create oral, written, and media focusing on using language for practical and workplace purposes. The course is intended to prepare students for the compulsory Grade 12 workplace preparation course. Prerequisite: Grade 10 English, Academic or Applied

## **NBE3UO** English, University Preparation Grade 11

This course emphasizes consolidation of literacy, critical thinking, and communication skills. Students will analyse a range of challenging texts from various time periods, countries, and cultures; write analytical and argumentative essays and a major paper for an independent literary research project; and apply key concepts to analyse media works. An important focus will be on understanding academic language and using it coherently and confidently in discussion and argument.

Prerequisite: English, Grade 10, University Preparation with a recommended mark of 65%

## **NDA3MO** Issues of Indigenous Peoples in a Global Context, University/College Preparation Grade 11

This course examines historical and contemporary issues of concern to Indigenous peoples from a global perspective. Students will explore the richness, depth, and diversity of Indigenous cultures, traditions and knowledge. They will consider how diverse Indigenous communities persevere despite recent global environmental and economic trends. Topics such as identity, social justice, human rights and abuses, spirituality, resistance and protest for change will be investigated.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in Native studies

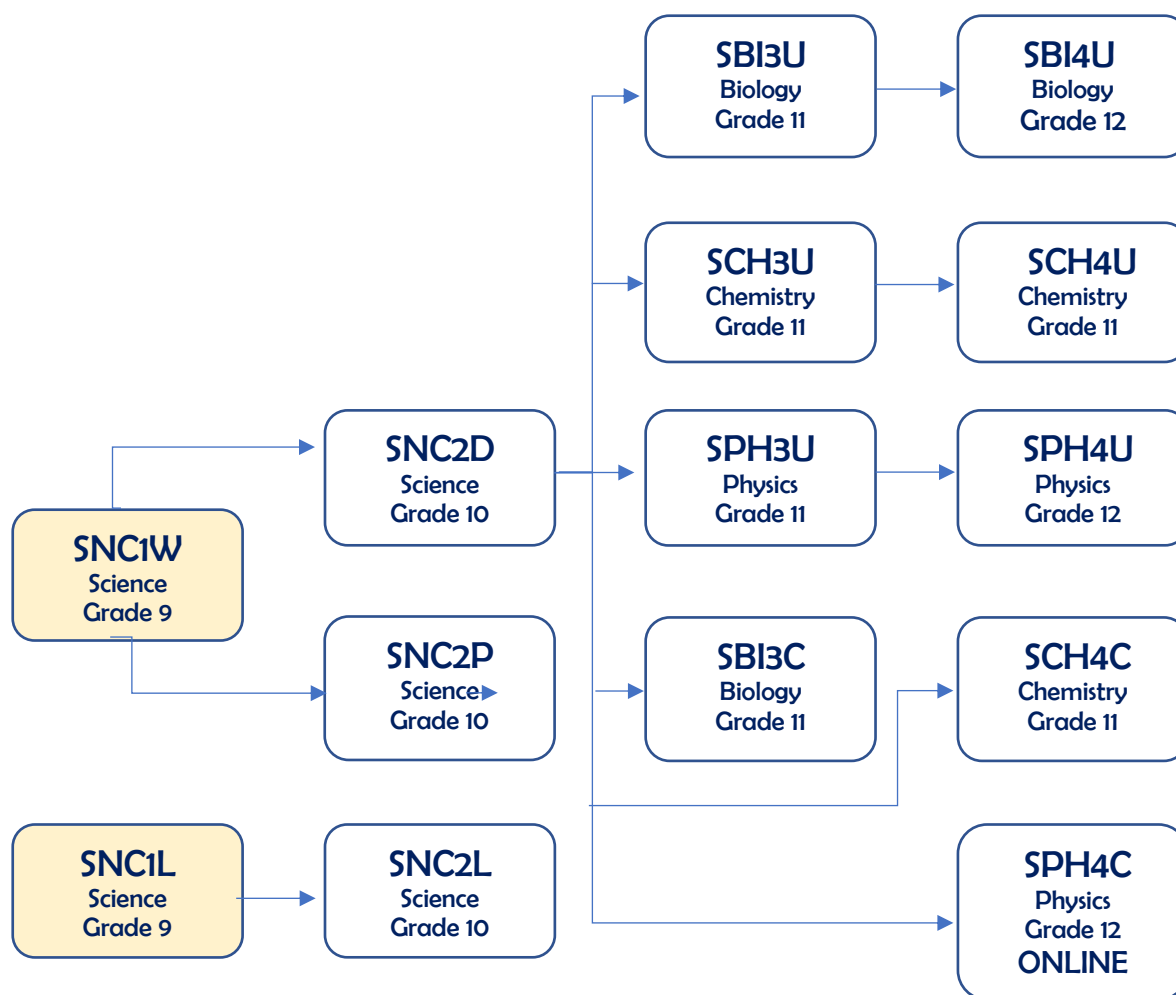

## **NDW4MO** Issues of Peoples in a Global Context, Grade 12, University/College Preparation

This course provides students with an overview of the issues and challenges that confront indigenous peoples worldwide. Students will develop an understanding of the concerns and aspirations of the world's indigenous population, plan and conduct research on global issues that have an impact on indigenous peoples, and use information technology to consult materials related to the views of indigenous peoples throughout the world.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in Native studies

# SCIENCE

## **SNC1W** Science, De-streamed Grade 9

This course enables students to develop their understanding of concepts related to biology, chemistry, physics, and earth and space science, and to relate science to technology, society, and the environment. Throughout the course, students will develop and refine their STEM skills as they use scientific research, scientific experimentation, and engineering design processes to investigate concepts and apply their knowledge in situations that are relevant to their lives and communities. Students will continue to develop transferable skills as they become scientifically literate global citizens.

## **SNC1L** Science, Locally Developed Grade 9

This course emphasizes reinforcing and strengthening science-related knowledge and skills, including scientific inquiry, critical thinking, and the relationship between science, society, and the environment, to prepare students for success in everyday life, in the workplace, and in the Science Grade 11 Workplace Preparation course. Students explore a range of topics, including science in daily life, properties of common materials, life-sustaining processes in simple and complex organisms, and electrical circuits. Students have the opportunity to extend mathematical and scientific process skills and to continue developing their skills in reading, writing, and oral language through relevant and practical science activities.

## **SNC2DO** Science, Academic Grade 10

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter.

**Prerequisite:** Science, Grade 9, Applied SNC1PO or Science, Grade 9, Academic SNC1W

## SNC2PO Science, Applied Grade 10

This course enables students to develop a deeper understanding of concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science in real-world situations. Students are given opportunities to develop further practical skills in scientific investigation. Students will plan and conduct investigations into everyday problems and issues related to human cells and body systems; chemical reactions; factors affecting climate change; and the interaction of light and matter.

Prerequisite: Science, Grade 9, Applied (SNC1PO) or Science, Grade 9, Academic (SNC1DO)

## BIOLOGY

### SBI3CO Biology, College Preparation Grade 11

This course focuses on the processes that occur in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, genetics, the anatomy of mammals, and the structure of plants and their role in the natural environment. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: Science, Grade 10, Academic or Applied

### SBI3UO Biology, University Preparation Grade 11

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Prerequisite: Science, Grade 10, Academic with a recommended mark of 65%

### SBI4UO Biology, University Preparation Grade 12

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: Biology, Grade 11, University Preparation with a recommended mark of 65. SCH3UO also recommended.

## CHEMISTRY

### SCH3UO Chemistry, University Preparation Grade 11

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

Prerequisite: Science, Grade 10, Academic with a recommended mark of 65%

### SCH4UO Chemistry, University Preparation Grade 12

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

Prerequisite: Grade 11, Chemistry, University Preparation with a recommended mark of 65%

## SCH4CO Chemistry, College Preparation Grade 12

This course enables students to develop an understanding of chemistry through the study of matter and qualitative analysis, organic chemistry, electrochemistry, chemical calculations, and chemistry as it relates to the quality of the environment. Students will use a variety of laboratory techniques, develop skills in data collection and scientific analysis, and communicate scientific information using appropriate terminology. Emphasis will be placed on the role of chemistry in daily life and the effects of technological applications and processes on society and the environment.

Prerequisite: Science, Grade 10, Academic or Applied

## PHYSICS

### SPH3UO Physics, University Preparation Grade 11

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment.

Prerequisite: Science, Grade 10, Academic with a recommended mark of 65%

### SPH4UO Physics, University Preparation Grade 12

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data relating to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: Physics, Grade 11, University Preparation with a recommended mark of 65%

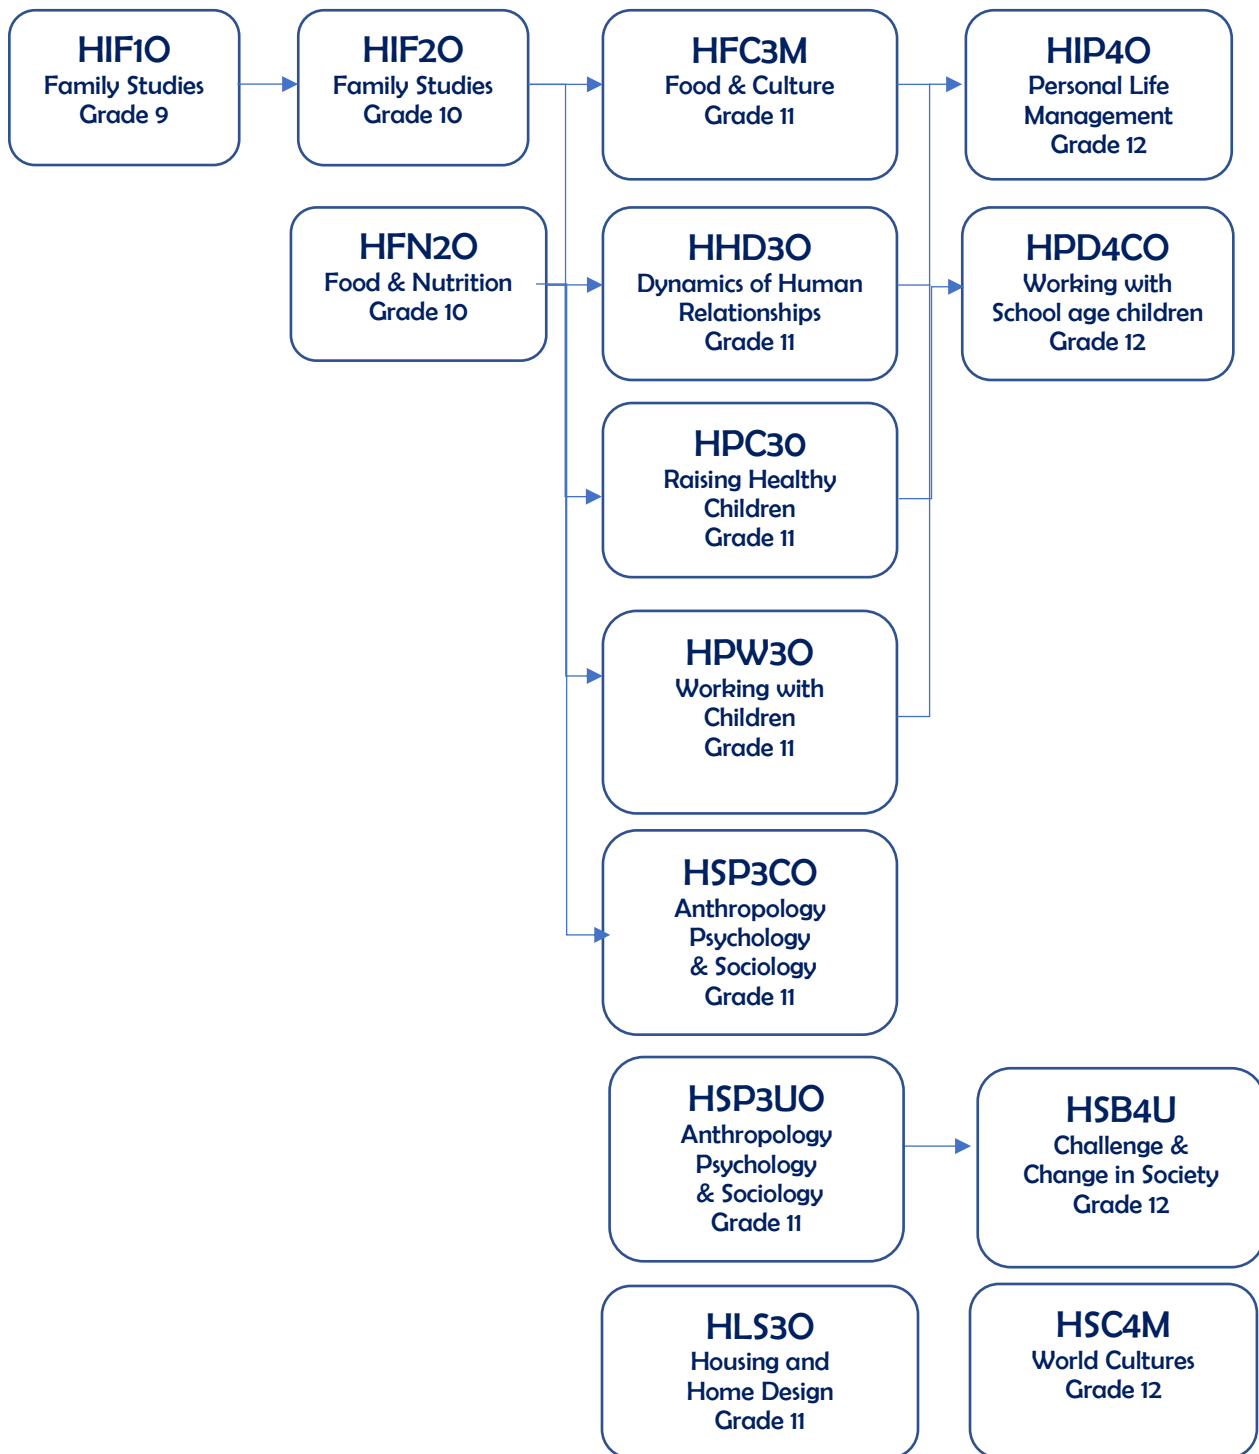

### SPH4CO Physics, College Preparation Grade 12

This course develops students' understanding of the basic concepts of physics. Students will explore these concepts as they relate to mechanical, electrical, fluid (hydraulic and pneumatic), and communications systems, as well as to the operation of commonly used tools and equipment. They will develop scientific inquiry skills as they verify accepted laws of physics and solve both assigned problems and those emerging from their investigations. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: Science, Grade 10, Academic or Applied

# SOCIAL SCIENCES AND HUMANITIE

## **HIF10/20 Exploring Family Studies, Grade 9 or 10**

This course explores, within the context of families, some of the fundamental challenges people face: how to meet basic needs, how to relate to others, how to manage resources, and how to become responsible members of society. Students will explore adolescent development and will have opportunities to develop interpersonal, decision-making, and practical skills related to daily life. They will learn about the diverse ways in which families function in Canada and will use research skills as they explore topics related to individual and family needs and resources.

Prerequisite: None

**HFN200 Food and Nutrition, Open Grade 10**

This course focuses on guidelines for making nutritious food choices. Students will investigate factors that influence food choices, including beliefs, attitudes, current trends, traditional eating patterns, food marketing strategies, and individual needs. Students will also explore the environmental impact of a variety of food choices at the local and global level. The course provides students with opportunities to develop food preparation skills and introduces them to the use of social science research methods in the area of food and nutrition.

**HFC3M Food and Culture, Grade 11 University/College**

This course focuses on the flavours, aromas, cooking techniques, foods, and cultural traditions of world cuisines. Students will explore the origins of and developments in diverse food traditions. They will demonstrate the ability to cook with ingredients and equipment from a variety of cultures, compare food-related etiquette in many countries and cultures, and explain how Canadian food choices and traditions have been influenced by other cultures. Students will develop practical skills and apply social science research methods while investigating foods and food practices from around the world.

Prerequisite: None

**HHD30 Dynamics of Human Relationships, Grade 11**

This course focuses on helping students understand the individual and group factors that contribute to healthy relationships. Students will examine the connections between their own self-concept and their interpersonal relationships. They will learn and practise strategies for developing and maintaining healthy relationships with friends, family, and community members, as well as with partners in intimate relationships. Students will use research and inquiry skills to investigate topics related to healthy relationships.

Prerequisite: None

**HIP400 Personal Life Management, Open Grade 12**

This course focuses on preparing students for living independently and working successfully with others. Students will learn to manage their personal resources to meet their basic needs for food, clothing, and housing. They will also learn about their personal, legal, and financial responsibilities and develop and apply interpersonal skills in order to make wise and responsible personal and occupational choices. Students will apply research and inquiry skills while investigating topics related to personal life management. The course emphasizes the achievement of expectations through practical experiences.

Prerequisite: None.

**HLS30 Housing and Home Design, Open Grade 11**

This course introduces students to a range of issues related to housing and home design. Students will learn about the needs that housing fulfils; housing options; home maintenance and safety; and environmental, economic, legal, and social considerations related to housing. They will use the elements and principles of design to analyse design and decorating decisions. Students will develop research skills as they investigate issues related to housing and home design.

Prerequisite: None

**HPC30 Raising Healthy Children, Grade 11**

This course focuses on the skills and knowledge parents, guardians, and caregivers need, with particular emphasis on maternal health, pregnancy, birth, and the early years of human development (birth to six years old). Through study and practical experience, students will learn how to meet the developmental needs of young children, communicate with them, and effectively guide their early behaviour. Students will develop their research skills through investigations related to caregiving and child rearing.

Prerequisite: None

**HPW3CO Living and Working With Children, College Preparation Grade 11**

This course prepares students for occupations involving children from birth to six years of age. Students will study theories about child behaviour and development, and will have opportunities for research and observation and for practical experiences with young children. Students will become familiar with occupational opportunities and requirements related to working with infants and young children. They will also have opportunities to develop research and critical-thinking skills as they investigate and evaluate current research about early childhood education.

**HPD4CO Working with School-Age Children and Adolescents, College Preparation Grade 12**

This course prepares students for occupations involving school-age children and adolescents. Students will study a variety of theories about child behaviour and development, and will have opportunities for research and observation and for practical experiences with older children. Students will become familiar with occupational opportunities and requirements related to working with older children and adolescents. They will develop research skills used in investigating child and adolescent behaviour and development.

Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.

**HSP3UO Introduction to Anthropology, Psychology, and Sociology, University Preparation Grade 11**

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science, and to become familiar with current thinking on a range of issues within the three disciplines.

Prerequisite: The Grade 10 *academic* course in English or the Grade 10 *academic* history course.

**HSP3CO Introduction to Anthropology, Psychology, and Sociology, College Preparation Grade 11**

This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. They will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines.

**HSB4UO Challenge and Change in Society, University Preparation Grade 12**

This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change.

Prerequisite: Any university, university/college, or college preparation course in social sciences and humanities, English, or Canadian and world studies

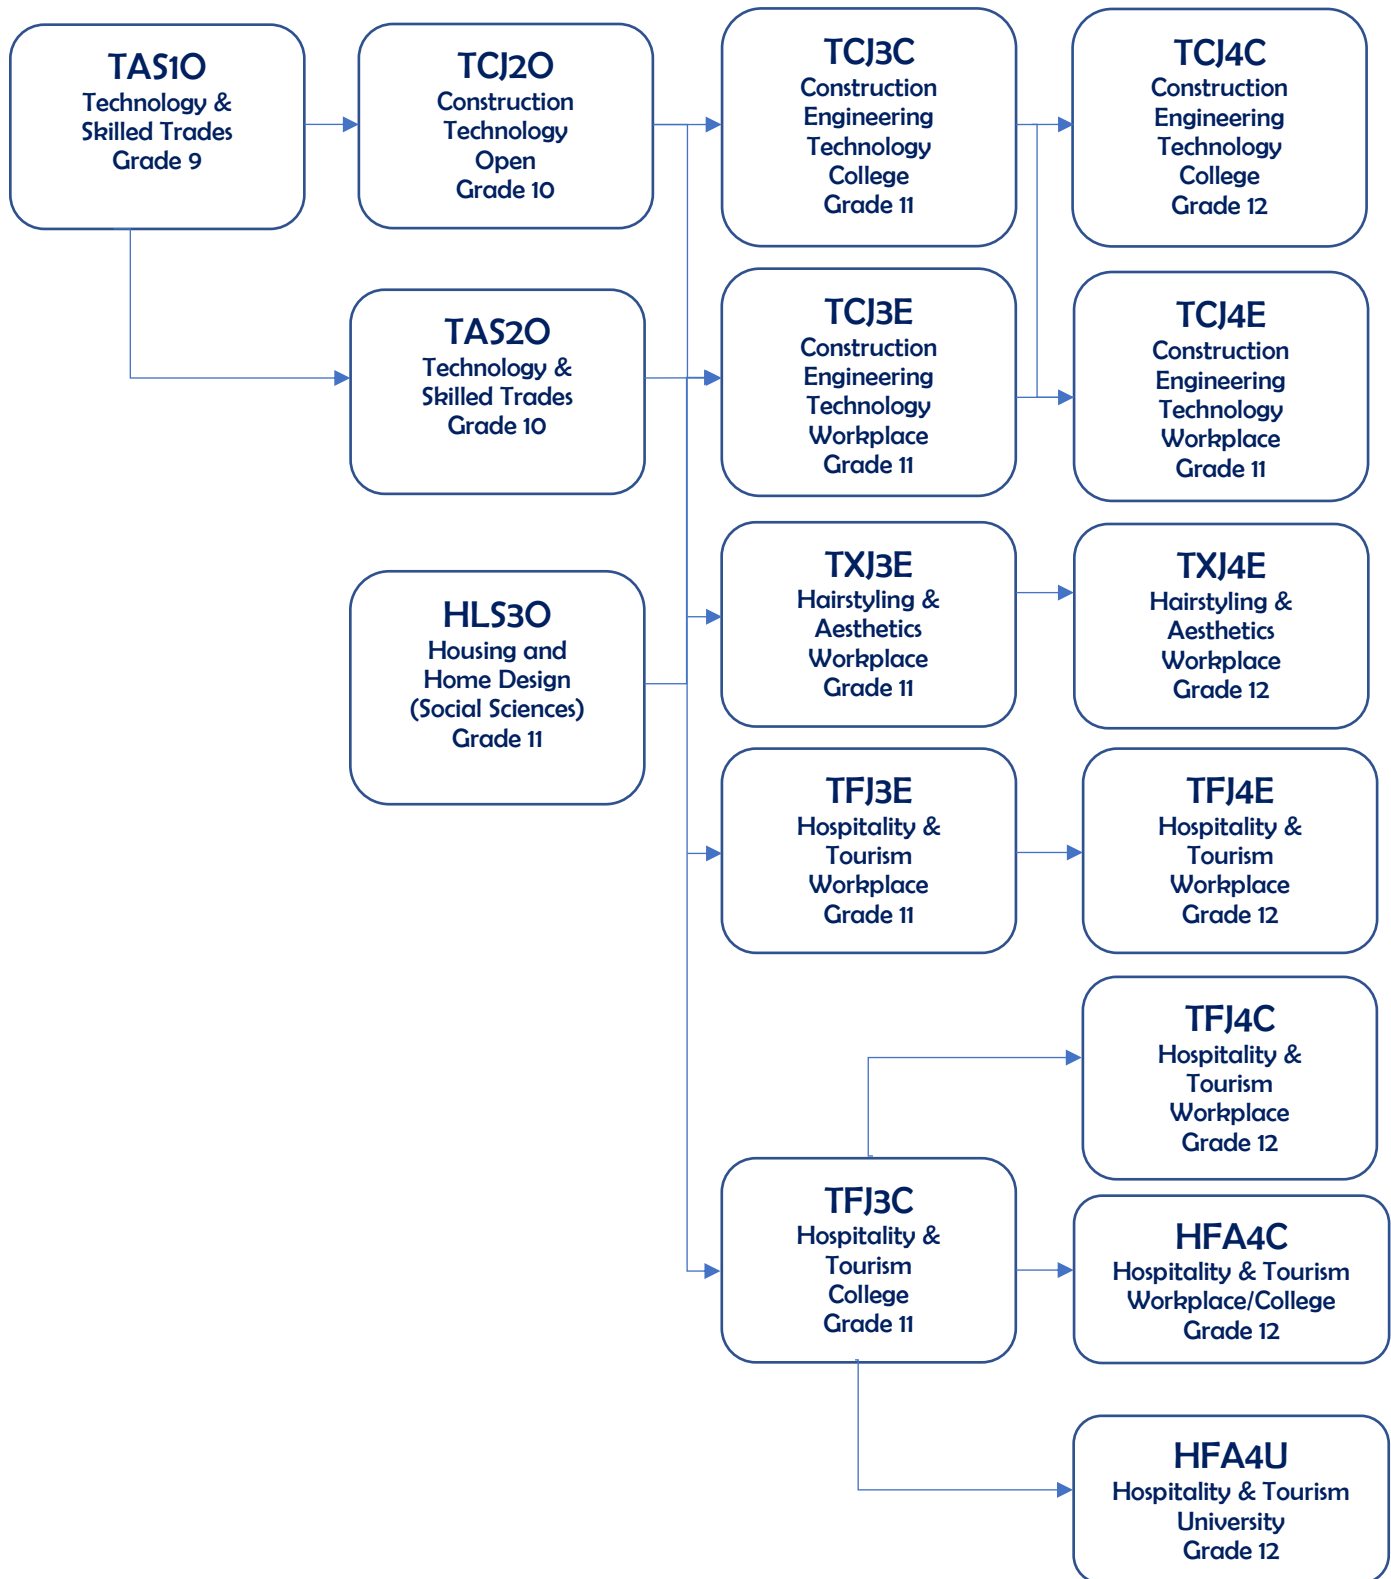

**HSC4M World Cultures, Grade 12 University/College Preparation**

This course examines the nature of culture; how cultural identities are acquired, maintained, and transformed; and theories used to analyse cultures. Students will explore world cultures, with an emphasis on the analysis of religious and spiritual beliefs, art forms, and philosophy. They will study the contributions and influence of a range of cultural groups and will critically analyse issues facing ethnocultural groups within Canada and around the world. Students will develop and apply research skills and will design and implement a social action initiative relating to cultural diversity.

Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

# TECHNOLOGICAL STUDIES

# ***TECHNOLOGY & SKILLED TRADES***

## **TAS1O Technology and the Skilled Trades, Grade 9**

This course enables students to further explore and develop technological knowledge and skills introduced in the elementary science and technology program. Students will be given the opportunity to design and create products and/or provide services related to the various technological areas or industries, working with a variety of tools, equipment, and software commonly used in industry. Students will develop an awareness of environmental and societal issues, and will begin to explore secondary and postsecondary education and training pathways leading to careers in technology-related fields.

**Prerequisite:** None

## **TAS2O Technology and the Skilled Trades, Grade 10**

This hands-on course enables students to further explore the engineering design process and develop other technological knowledge and skills introduced in earlier grades. Students will design and safely create prototypes, products, and/or services, working with tools and technologies from various industries. As students develop their projects to address real-life problems, they will apply technological concepts such as precision measurement, as well as health and safety standards. Students will begin to explore job skills programs and education and training pathways, including skilled trades, that can lead to a variety of careers.

**Prerequisite:** None

# ***CONSTRUCTION***

## **TCJ200 Construction Technology, Open Grade 10**

This course introduces students to building materials and processes through opportunities to design and build various construction projects. Students will learn to create and read working drawings; become familiar with common construction materials, components, and processes; and perform a variety of fabrication, assembly, and finishing operations. They will use a variety of hand and power tools and apply knowledge of imperial and metric systems of measurement, as appropriate. Students will develop an awareness of environmental and societal issues related to construction technology, and will explore secondary and postsecondary pathways leading to careers in the industry.

**Prerequisite:** None

## **TCJ3CO Construction Engineering Technology, College Preparation Grade 11**

This course focuses on the development of knowledge and skills related to residential construction. Students will gain hands-on experience using a variety of construction materials, processes, tools, and equipment; learn about building design and planning construction projects; create and interpret working drawings and sections; and learn how the Ontario Building Code and other regulations and standards apply to construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and explore career opportunities in the field.

**Prerequisite:** None

## **TCJ3EO Construction Engineering Technology, Workplace Preparation Grade 11**

This course enables students to develop technical knowledge and skills related to carpentry, masonry, electrical systems, heating and cooling, and plumbing for residential construction. Students will gain hands-on experience using a variety of materials, processes, tools, and equipment to design, lay out, and build projects. They will create and read technical drawings, learn construction terminology, interpret building codes and regulations, and apply mathematical skills as they develop construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and will explore postsecondary and career opportunities in the field.

**Prerequisite:** None

## **HLS3O Housing and Home Design, Grade 11 Open**

This course introduces students to a range of issues related to housing and home design. Students will learn about the needs that housing fulfills; housing options; home maintenance and safety; and environmental, economic, legal, and social considerations related to housing. They will use the elements and principles of design to analyse design and decorating decisions. Students will develop research skills as they investigate issues related to housing and home design.

**Prerequisite:** None

**TCJ4CO** Grade 12, Construction Engineering Technology, College Preparation

This course enables students to further develop knowledge and skills related to residential construction and to explore light commercial construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment and will learn more about building design and project planning. They will continue to create and interpret construction drawings and will extend their knowledge of construction terminology and of relevant building codes and regulations, as well as health and safety standards and practices. Students will also focus on environmental and societal issues related to construction engineering technology, and explore career opportunities in the field.

Prerequisite: Construction Engineering Technology, Grade 11, College Preparation

**TCJ4E** Construction Technology, Workplace Preparation Grade 12

This course enables students to further develop technical knowledge and skills related to residential construction and to explore light commercial construction. Students will continue to gain hands-on experience using a variety of materials, processes, tools, and equipment; create and interpret construction drawings; and learn more about building design and project planning. They will expand their knowledge of terminology, codes and regulations, and health and safety standards related to residential and light commercial construction. Students will also expand their awareness of environmental and societal issues related to construction technology, and will explore entrepreneurship and career opportunities in the industry that may be pursued directly after graduation.

Prerequisite: Construction Technology, Grade 11, Workplace Preparation

## *HAIRSTYLING*

**TXJ3EO** Hairstyling and Aesthetics, Workplace Preparation Grade 11

This course enables students to develop knowledge and skills in cosmetology and offers a variety of applications that will equip students to provide services for a diverse clientele. Students identify trends in the hairstyling and aesthetics industry, learn about related health and safety laws, and expand their communication and interpersonal skills through interactions with peers and clients. Students consider environmental and societal issues related to the industry and acquire a more detailed knowledge of apprenticeships and direct entry work positions.

Prerequisite: None

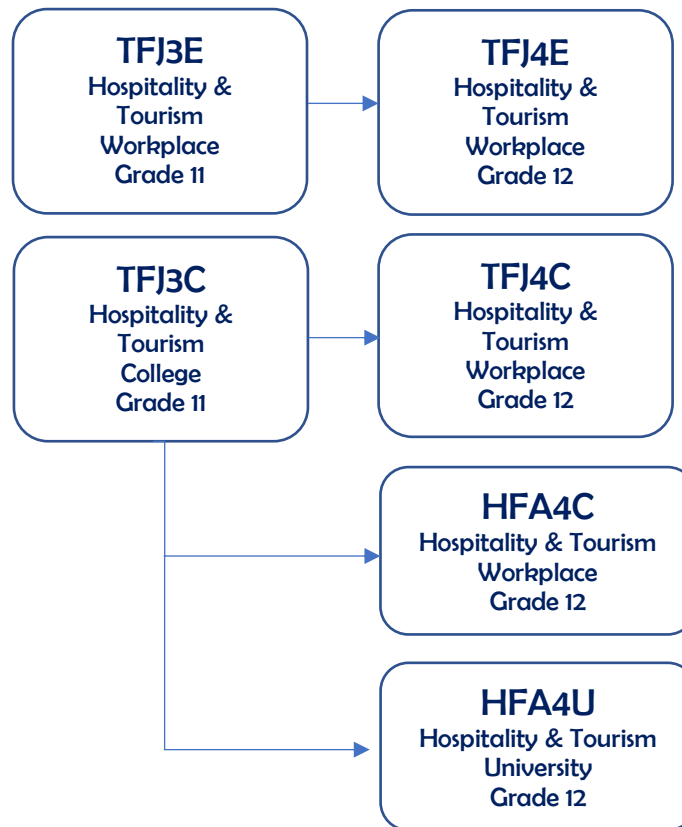

**TXJ4EO** Hairstyling and Aesthetics, Workplace Preparation Grade 12,

This course enables students to develop increased proficiency in a wide range of hairstyling and aesthetics services. Working in a salon/spa team environment, students strengthen their fundamental cosmetology skills and develop an understanding of common business practices and strategies in the salon/spa industry. Students expand their understanding of environmental and societal issues and their knowledge of postsecondary destinations in the hairstyling and aesthetics industry.

Prerequisite: Hairstyling and Aesthetics, Grade 11, Workplace Preparation

# HOSPITALITY AND TOURISM

## **TFJ3CO Culinary Arts and Management, College Preparation Grade 11**

This course enables students to develop or expand knowledge and skills related to hospitality, with an emphasis on basic food preparation. Students will learn about preparing and presenting food, evaluating facilities, controlling inventory, and marketing and managing events and activities, and will investigate customer service principles and the cultural and economic forces that drive tourism trends. Students will develop an awareness of health and safety standards, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: None

## **TFB3EO Baking, Workplace Preparation Grade 11**

This course enables students to acquire knowledge and skills related to baking and pastry arts hospitality opportunities. Students will receive practical, theoretical, and hands-on training, in order to prepare, present, and serve baked goods using a variety of tools and equipment. Focus will be placed on the fundamentals of providing high quality service to ensure customer satisfaction. Students will develop an awareness of health and safety practices, environmental and societal issues, and career opportunities in the food and beverage services sector with an emphasis on baking and pastry arts.

Prerequisite: None

## **TFT4CO Tourism and Travel Planning, College Preparation Grade 12**

This course enables students to further develop knowledge and skills related to the various sectors of the tourism industry. Students will demonstrate advanced food preparation and presentation skills; increase health and wellness knowledge; develop tourism administration and management skills; design and implement a variety of events or activities; and investigate principles and procedures that contribute to high-quality customer service. Students will expand their awareness of health and safety issues, environmental and societal issues, and career opportunities in the tourism industry.

Prerequisite: Hospitality and Tourism, Grade 11, College Preparation / Culinary Arts and Management, College Preparation

**TFJ4EO**            **Cooking, Workplace Preparation Grade 12**

This course enables students to further develop knowledge and skills related to the food and beverage services sector of the tourism industry. Students will demonstrate proficiency in using food preparation and presentation tools and equipment; plan nutritious menus, create recipes, and prepare and present finished food products; develop customer service skills; and explore event and activity planning. Students will expand their awareness of health and safety practices, environmental and societal issues, and career opportunities in the food and beverage services sector.

Prerequisite: Hospitality and Tourism, Grade 11, Workplace Preparation or Baking, Grade 11, Workplace

**HFA4C**            **Nutrition and Health, College Preparation Grade 12**

This course focuses on the relationship between nutrition and health at different stages of life and on global issues related to food production. Students will investigate the role of nutrition in health and disease and assess strategies for promoting food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and refine their ability to use social science research and inquiry methods to investigate topics related to nutrition and health.

Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

**HFA4U**            **Nutrition and Health, University Preparation Grade 12**

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health. Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

Culinary Arts

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			
Course Code	Grade Subject	Course Name	Course Description
AVI3M	11 Arts	Visual Arts	This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design). Prerequisite: Visual Arts, Grade 9 or 10, Open
AWR4M	12 Arts	Film Studies	Love movies? This course is an introduction to the art, history, and analysis of film. Students will learn about the technical, aesthetic, and cultural elements of modern films, and will develop the skills necessary to analyze and interpret films. The course will cover a range of film movements, styles, and genres, and will consider the ways in which films reflect and shape the societies in which they are produced.
BAF3M	11 Business	Financial Accounting Fundamentals	This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and ethics and current issues in accounting. Prerequisite: None
BBB4M	12 Business	International Business Fundamentals	This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for postsecondary programs in business, including international business, marketing, and management. Prerequisite: None
BDI3C	11 Business	Entrepreneurship: The Venture	This course focuses on ways in which entrepreneurs recognize opportunities, generate ideas, and organize resources to plan successful ventures that enable them to achieve their goals. Students will create a venture plan for a school-based or student-run business. Through hands-on experiences, students will have opportunities to develop the values, traits, and skills most often associated with successful entrepreneurs. Prerequisite: None
BOH4M	12 Business	Business Leadership: Management Fundamentals	This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized. Prerequisite: None

## 2024-2025 Day School eLearning – Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			
Course Code	Grade Subject	Course Name	Course Description
CGF3M	11 Geography	Forces of Nature: Physical Processes and Disasters	In this course, students will explore physical processes related to the earth's water, land, and air. They will investigate how these processes shape the planet's natural characteristics and affect human systems, how they are involved in the creation of natural disasters, and how they influence the impacts of human disasters. Throughout the course, students will apply the concepts of geographic thinking and the geographic inquiry process and use spatial technologies to analyse these processes, make predictions related to natural disasters, and assess ways of responding to them. Prerequisite: Issues in Canadian Geography, Grade 9, Academic or Applied
CGF3MF	11 Geography	<i>French Immersion</i> - Forces of Nature: Physical Processes and Disasters	In this course, students will explore physical processes related to the earth's water, land, and air. They will investigate how these processes shape the planet's natural characteristics and affect human systems, how they are involved in the creation of natural disasters, and how they influence the impacts of human disasters. Throughout the course, students will apply the concepts of geographic thinking and the geographic inquiry process and use spatial technologies to analyse these processes, make predictions related to natural disasters, and assess ways of responding to them. Prerequisite: Issues in Canadian Geography, Grade 9, Academic or Applied
CGG3O	11 Geography	Travel and Tourism: A Geographic Perspective	This course focuses on issues related to travel and tourism within and between various regions of the world. Students will investigate unique environmental, sociocultural, economic, and political characteristics of selected world regions. They will explore travel patterns and trends, as well as tensions related to tourism, and will predict future tourism destinations. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate the impact of the travel industry on natural environments and human communities. Prerequisite: Issues in Canadian Geography, Grade 9, Academic or Applied
CGRAM	12 Geography	The Environment and Resource Management	This course investigates interactions between natural and human systems, with a particular emphasis on the impacts of human activity on ecosystems and natural processes. Students will use the geographic inquiry process, apply the concepts of geographic thinking, and employ a variety of spatial skills and technologies to analyse these impacts and propose ways of reducing them. In the course of their investigations, they will assess resource management and sustainability practices, as well as related government policies and international accords. They will also consider questions of individual responsibility and environmental stewardship as they explore ways of developing a more sustainable relationship with the environment. Prerequisite: Any university, university/college, or college preparation course in Canadian and world studies, English, or social sciences and humanities
CGW4U	12 Geography	World Issues: A Geographic Analysis	In this course, students will address the challenge of creating a more sustainable and equitable world. They will explore issues involving a wide range of topics, including economic disparities, threats to the environment, globalization, human rights, and quality of life, and will analyse government policies, international agreements, and individual responsibilities relating to them. Students will apply the concepts of geographic thinking and the geographic inquiry process, including the use of spatial technologies, to investigate these complex issues and their impacts on natural and human communities around the world. Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning		Course Description
Course Code	Grade Subject	Course Name
CH14U	12 History	Canada: History, Identity, and Culture  This course traces the history of Canada, with a focus on the evolution of our national identity and culture as well as the identity and culture of various groups that make up Canada. Students will explore various developments and events, both national and international, from precontact to the present, and will examine various communities in Canada and how they have contributed to identity and heritage in Canada. Students will investigate the development of culture and identity, including national identity, in Canada and how and why they have changed throughout the country's history. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate the people, events, and forces that have shaped Canada.  Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities
CHV2OF	10 Politics	French Immersion - Civics and Citizenship  This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them. This course also includes learning on digital literacy and critical-thinking skills, the mechanisms of government, Indigenous governance systems and structures, the historical foundations of the rights and freedoms we enjoy in Canada, ways in which government policy affects individuals' lives and the economy, and ways for students to serve their communities.  Prerequisite: None

Regular Day School eLearning			
Course Code	Grade Subject	Course Name	Course Description
GLC20F	10 Guidance and Career Education	French Immersion - Career Studies	This course gives students the opportunity to develop the skills, knowledge, and habits that will support them in their education and career/life planning. Students will learn about global work trends, and seek opportunities within the school and community to expand and strengthen their transferable skills and their ability to adapt to the changing world of work. On the basis of exploration, reflective practice, and decision-making processes, students will make connections between their skills, interests, and values and their postsecondary options, whether in apprenticeship training, college, community living, university, or the workplace. They will set goals and create a plan for their first postsecondary year. As part of their preparation for the future, they will learn about personal financial management – including the variety of saving and borrowing tools available to them and how to use them to their advantage – and develop a budget for their first year after secondary school. Prerequisite: None
GLC20	10 Guidance and Career Education	Career Studies	This course gives students the opportunity to develop the skills, knowledge, and habits that will support them in their education and career/life planning. Students will learn about global work trends, and seek opportunities within the school and community to expand and strengthen their transferable skills and their ability to adapt to the changing world of work. On the basis of exploration, reflective practice, and decision-making processes, students will make connections between their skills, interests, and values and their postsecondary options, whether in apprenticeship training, college, community living, university, or the workplace. They will set goals and create a plan for their first postsecondary year. As part of their preparation for the future, they will learn about personal financial management – including the variety of saving and borrowing tools available to them and how to use them to their advantage – and develop a budget for their first year after secondary school. Prerequisite: None
CHW3M	11 History	World History to the End of the Fifteenth Century	This course explores the history of various societies and civilizations around the world, from earliest times to around 1500 CE. Students will investigate a range of factors that contributed to the rise, success, and decline of various ancient and pre-modern societies throughout the world and will examine life in and the cultural and political legacy of these societies. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating social, political, and economic structures and historical forces at work in various societies and in different historical eras. Prerequisite: Canadian History since World War I, Grade 10, Academic or Applied
CHY4U	12 History	World History since the Fifteenth Century	This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and ideas and assess societal progress or decline in world history. Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities.

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning		Course Description
Course Code	Grade Subject	Course Name
CLAU	12 Economics	Analysing Economic Issues  This course examines current Canadian and international economic issues, developments, policies, and practices from diverse perspectives. Students will explore the decisions that individuals and institutions, including governments, make in response to economic issues such as globalization, trade agreements, economic inequalities, regulation, and public spending. Students will apply the concepts of economic thinking and the economic inquiry process, as well as economic models and theories, to investigate, and develop informed opinions about, economic trade-offs, growth, and sustainability and related economic issues.  Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities
CLN4U	12 Law	Canadian and International Law  This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop an understanding of the principles of Canadian and international law and of issues related to human rights and freedoms, conflict resolution, and criminal, environmental, and workplace law, both in Canada and internationally. Students will apply the concepts of legal thinking and the legal studies inquiry process, and will develop legal reasoning skills, when investigating these and other issues in both Canadian and international contexts.  Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities
CLU3M	11 Law	Understanding Canadian Law  This course explores Canadian law, with a focus on legal issues that are relevant to the lives of people in Canada. Students will gain an understanding of laws relating to rights and freedoms in Canada; our legal system; and family, contract, employment, tort, and criminal law. Students will develop legal reasoning skills and will apply the concepts of legal thinking and the legal studies inquiry process when investigating a range of legal issues and formulating and communicating informed opinions about them.  Prerequisite: Canadian History since World War I, Grade 10, Academic or Applied
EMSSO	11 English	Media Studies  This course emphasizes knowledge and skills that will enable students to understand media communication in the twenty-first century and to use media effectively and responsibly. Through analysing the forms and messages of a variety of media works and audience responses to them, and through creating their own media works, students will develop critical thinking skills, aesthetic and ethical judgement, and skills in viewing, representing, listening, speaking, reading, and writing.  Prerequisite: English, Grade 10, Academic or Applied
ENG4C	12 English	College Prep English  This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.  Prerequisite: English, Grade 11, College Preparation

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

		Regular Day School eLearning	
Course Code	Grade Subject	Course Name	Course Description
ENG4U	12 English	University Prep English	This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace. Prerequisite: English, Grade 11, University Preparation
EWCAU	12 English	The Writer's Craft	This course emphasizes knowledge and skills related to the craft of writing. Students will analyse models of effective writing; use a workshop approach to produce a range of works; identify and use techniques required for specialized forms of writing; and identify effective ways to improve the quality of their writing. They will also complete a major paper as part of a creative or analytical independent study project and investigate opportunities for publication and for writing careers. Prerequisite: English, Grade 11, University Preparation
GLS4O	12 Guidance and Career Education	Advanced Learning Strategies: Skills for Success After Secondary School	This course improves students' learning and personal-management skills, preparing them to make successful transitions to work, training, and/or postsecondary education destinations. Students will assess their learning abilities and use literacy, numeracy, and research skills and personal-management techniques to maximize their learning. Students will investigate trends and resources to support their postsecondary employment, training, and/or education choices and develop a plan to help them meet their learning and career goals. Prerequisite: None
GWL3O	11 Guidance and Career Education	Designing Your Future	This course prepares students to make successful transitions to postsecondary destinations as they investigate specific postsecondary options based on their skills, interests, and personal characteristics. Students will explore the realities and opportunities of the workplace and examine factors that affect success, while refining their job-search and employability skills. Students will develop their portfolios with a focus on their targeted destination and develop an action plan for future success. Prerequisite: None
HFA4U	12 Social Sciences Humanities	Health and Nutrition	This social science course focuses on food literacy and the relationship between health and nutrition at different stages of life (healthy eating, safe food prep practices) as well as global issues and food production (food security, environmental responsibility, sustainability...) while using social science research and inquiry methods. Food literacy means knowing where food comes from, what impacts our food choices have on the environment, knowing what grows locally and what is imported, what foods are in season, and what food is healthy.

## 2024-2025 Day School eLearning – Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			
Course Code	Grade/Subject	Course Name	Course Description
HH54J	12 Social Sciences Humanities	Families in Canada	This course enables students to draw on sociological, psychological, and anthropological theories and research to analyse the development of individuals, intimate relationships, and family and parent-child relationships. Students will focus on issues and challenges facing individuals and families in Canada's diverse society. They will develop analytical tools that enable them to assess various factors affecting families and to consider policies and practices intended to support families in Canada. They will develop the investigative skills required to conduct and communicate the results of research on individuals, intimate relationships, and parent-child relationships. Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies
HLS3O	11 Social Sciences Humanities	Housing and Home Design	This course introduces students to a range of issues related to housing and home design. Students will learn about the needs that housing fulfils; housing options; home maintenance and safety; and environmental, economic, legal, and social considerations related to housing. They will use the elements and principles of design to analyse design and decorating decisions. Students will develop research skills as they investigate issues related to housing and home design. Prerequisite: None
HNC3C	11 Social Sciences Humanities	Understanding Fashion	This course introduces students to the world of fashion. Students will gain an understanding of theories related to fashion trends and of how culture, media, fashion cycles, retailing, and social and environmental factors influence fashion trends and consumer behaviour. Students will use various tools, technologies, and techniques safely and correctly to create fashion items. In addition, students will apply knowledge of fibres, fabrics, and the elements and principles of design when creating and assessing fashion-related products. Prerequisite: None
HPC3O	11 Social Sciences Humanities	Raising Healthy Children	This course focuses on the skills and knowledge parents, guardians, and caregivers need, with particular emphasis on maternal health, pregnancy, birth, and the early years of human development (birth to six years old). Through study and practical experience, students will learn how to meet the developmental needs of young children, communicate with them, and effectively guide their early behaviour. Students will develop their research skills through investigations related to caregiving and child rearing. Prerequisite: None
HSB4U	12 Social Sciences Humanities	Challenge and Change in Society	This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change. Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

Regular Day School eLearning			Course Description
Course Code	Grade Subject	Course Name	Course Description
HSBAUF	12 Social Sciences Humanities	<i>French Immersion - Challenge and Change in Society</i>	This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change. Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies
HSC4M	12 Social Sciences Humanities	World Cultures	This course examines the nature of culture; how cultural identities are acquired, maintained, and transformed; and theories used to analyse cultures. Students will explore world cultures, with an emphasis on the analysis of religious and spiritual beliefs, art forms, and philosophy. They will study the contributions and influence of a range of cultural groups and will critically analyse issues facing ethnocultural groups within Canada and around the world. Students will develop and apply research skills and will design and implement a social action initiative relating to cultural diversity. Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies
HSE4M	12 Social Sciences Humanities	Equity and Social Justice: From Theory to Practice	This course enables students to develop an understanding of the theoretical, social, and historical underpinnings of various equity and social justice issues and to analyse strategies for bringing about positive social change. Students will learn about historical and contemporary equity and social justice issues in Canada and globally. They will explore power relations and the impact of a variety of factors on equity and social justice. Students will develop and apply research skills and will design and implement a social action initiative relating to an equity or social justice issue. Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies
HSG3M	11 Social Sciences Humanities	Gender Studies	This course enables students to explore the social construction of gender. Students will learn about the dynamic nature of gender roles and norms; sexism and power relations; and the impact of representations of women and men in the media, popular culture, and the arts. Students will analyse a range of gender equity issues, including gender-based violence and workplace equity, in both Canadian and global contexts. Students will develop and apply research skills and will design and implement a social action initiative relating to gender equity. Prerequisite: None
HSP3C	11 Social Sciences Humanities	Introduction to Anthropology, Psychology, and Sociology	This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. Students will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines. Prerequisite: None

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			
Course Code	Grade Subject	Course Name	Course Description
HSP3U	11 Social Sciences Humanities	Introduction to Anthropology, Psychology, and Sociology	This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science research, and to become familiar with current thinking on a range of issues within the three disciplines. Prerequisite: The Grade 10 academic course in English, or the Grade 10 academic history course (Canadian and world studies)
HSP3UF	11 Social Sciences Humanities	<i>French Immersion</i> - Introduction to Anthropology, Psychology, and Sociology	This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science research, and to become familiar with current thinking on a range of issues within the three disciplines. Prerequisite: The Grade 10 academic course in English, or the Grade 10 academic history course (Canadian and world studies)
HZT4U	12 Social Sciences Humanities	Philosophy: Questions and Theories	This course enables students to acquire an understanding of the nature of philosophy and philosophical reasoning skills and to develop and apply their knowledge and skills while exploring specialized branches of philosophy (the course will cover at least three of the following branches: metaphysics, ethics, epistemology, philosophy of science, social and political philosophy, aesthetics). * Students will develop critical thinking and philosophical reasoning skills as they formulate and evaluate arguments related to a variety of philosophical questions and theories. They will also develop research and inquiry skills related to the study and practice of philosophy. Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies
ICS3C	11 Computer Studies	Introduction to Computer Programming	This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project. Students will also learn about computer environments and systems, and explore environmental issues related to computers, safe computing practices, emerging technologies, and postsecondary opportunities in computer-related fields. Prerequisite: None
ICS3U	11 Computer Studies	Introduction to Computer Science	This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development life-cycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields. Prerequisite: None

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning		Course Description
Course Code	Grade Subject	Course Name
ICS4C	12 Computer Studies	Computer Programming This course further develops students' computer programming skills. Students will learn object-oriented programming concepts, create object-oriented software solutions, and design graphical user interfaces. Student teams will plan and carry out a software development project using industry-standard programming tools and proper project management techniques. Students will also investigate ethical issues in computing and expand their understanding of environmental issues, emerging technologies, and computer-related careers. Prerequisite: Introduction to Computer Programming, Grade 11, College Preparation
ICS4U	12 Computer Studies	Computer Science This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyse algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field. Prerequisite: Introduction to Computer Science, Grade 11, University Preparation
MAP4C	12 Mathematics	Foundations for College Mathematics This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyse data using statistical methods; solve problems involving applications of geometry and trigonometry; solve financial problems connected with annuities, budgets, and renting or owning accommodation; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades. Prerequisite: Foundations for College Mathematics, Grade 11, College Preparation, or Functions and Applications, Grade 11, University/College Preparation
MBF3C	11 Mathematics	Foundations for College Mathematics This course enables students to broaden their understanding of mathematics as a problem-solving tool in the real world. Students will extend their understanding of quadratic relations; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; develop their ability to reason by collecting, analysing, and evaluating data involving one variable; connect probability and statistics; and solve problems in geometry and trigonometry. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. Prerequisite: Foundations of Mathematics, Grade 10, Applied
MCR3U	11 Mathematics	Functions This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems. Prerequisite: Principles of Mathematics, Grade 10, Academic

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			
Course Code	Grade Subject	Course Name	Course Description
MCV4U	12 Mathematics	Calculus and Vectors	<p>This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course.</p> <p>Note: The new Advanced Functions course (MHF4U) must be taken prior to or concurrently with Calculus and Vectors (MCV4U).</p>
MDM4U	12 Mathematics	Mathematics of Data Management	<p>This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing and analysing large amounts of information; solve problems involving probability and statistics; and carry out a culminating investigation that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.</p> <p>Prerequisite: Functions, Grade 11, University Preparation, or Functions and Applications, Grade 11, University/College Preparation</p>
MHF4U	12 Mathematics	Advanced Functions	<p>This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs. Prerequisite: Functions, Grade 11, University Preparation, or Mathematics for College Technology, Grade 12, College Preparation</p>
NBE3U	11 English	English: Understanding Contemporary First Nations, Métis, and Inuit Voices	<p>This course explores the themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyse the changing use of text forms by Indigenous authors/creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.</p> <p>Prerequisite: English, Grade 10, Academic</p>

## 2024-2025 Day School eLearning – Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning		Course Description
Course Code	Grade/Subject	Course Name
OLC40	12 English	Ontario Secondary School Literacy Course This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing. Eligibility requirement: Students who have been eligible to write the OSSLT at least twice and who have been unsuccessful at least once are eligible to take the course. (Students who have already met the literacy requirement for graduation may be eligible to take the course under special circumstances, at the discretion of the principal.)
PPZ3C	11 Health and Physical Education	Health for Life This course enables students to examine the factors that influence their own health practices and behaviours as well as those factors that contribute to the development of healthy communities. It emphasizes the concept of wellness, which addresses all aspects of well-being – physical, cognitive, emotional, spiritual, and social – and promotes healthy eating, physical activity, and building and maintaining a positive sense of self. Students will develop the skills necessary to make healthy choices and create a personal wellness plan. They will also design initiatives that encourage others to lead healthy, active lives. The course prepares students for college programs in health sciences, fitness, wellness, and health promotion. Prerequisite: None
PSK4U	12 Health and Physical Education	Introductory Kinesiology This course focuses on the study of human movement and of systems, factors, and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity and sport, and the physiological, psychological, and social factors that influence an individual's participation in physical activity and sport. The course prepares students for university programs in physical education and health, kinesiology, health sciences, health studies, recreation, and sports administration. Prerequisite: Any Grade 11 university or university/college preparation course in science, or any Grade 11 or 12 course in health and physical education
SB13C	11 Science	Biology This course focuses on the processes that occur in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, genetics, the anatomy of mammals, and the structure of plants and their role in the natural environment. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields. Prerequisite: Science, Grade 10, Academic or Applied
SB13U	11 Science	Biology This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation. Prerequisite: Science, Grade 10, Academic

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			Course Description
Course Code	Grade/Subject	Course Name	Course Description
SCH3U	11 Science	Chemistry	This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment. Prerequisite: Science, Grade 10, Academic
SCH4C	12 Science	Chemistry	This course enables students to develop an understanding of chemistry through the study of matter and qualitative analysis, organic chemistry, electrochemistry, chemical calculations, and chemistry as it relates to the quality of the environment. Students will use a variety of laboratory techniques, develop skills in data collection and scientific analysis, and communicate scientific information using appropriate terminology. Emphasis will be placed on the role of chemistry in daily life and the effects of technological applications and processes on society and the environment. Prerequisite: Science, Grade 10, Academic or Applied
SCH4U	12 Science	Chemistry	This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment. Prerequisite: Chemistry, Grade 11, University Preparation
SES4U	12 Science	Earth and Space Science	This course develops students' understanding of Earth and its place in the universe. Students will investigate the properties of and forces in the universe and solar system and analyse techniques scientists use to generate knowledge about them. Students will closely examine the materials of Earth, its internal and surficial processes, and its geological history, and will learn how Earth's systems interact and how they have changed over time. Throughout the course, students will learn how these forces, processes, and materials affect their daily lives. The course draws on biology, chemistry, physics, and mathematics in its consideration of geological and astronomical processes that can be observed directly or inferred from other evidence. Prerequisite: Science, Grade 10, Academic
SNC4M	12 Science	Science	This course enables students, including those pursuing postsecondary programs outside the sciences, to increase their understanding of science and contemporary social and environmental issues in health-related fields. Students will explore a variety of medical technologies, pathogens and disease, nutritional science, public health issues, and biotechnology. The course focuses on the theoretical aspects of the topics under study and helps refine students' scientific investigation skills. Prerequisite: Science, Grade 10, Academic, or any Grade 11 university, university/college, or college preparation course in science

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning			
Course Code	Grade Subject	Course Name	Course Description
SPH3U	11 Science	Physics	This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment. Prerequisite: Science, Grade 10, Academic
SPH4C	12 Science	Physics	This course develops students' understanding of the basic concepts of physics. Students will explore these concepts with respect to motion; mechanical, electrical, electromagnetic, energy transformation, hydraulic, and pneumatic systems; and the operation of commonly used tools and machines. They will develop their scientific investigation skills as they test laws of physics and solve both assigned problems and those emerging from their investigations. Students will also consider the impact of technological applications of physics on society and the environment. Prerequisite: Science, Grade 10, Academic or Applied
SPH4U	12 Science	Physics	This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment. Prerequisite: Physics, Grade 11, University Preparation
TGP3M	11 Technology	Communications - Smartphone Photography	Addicted to your smartphone? Use it to your advantage and learn how to increase your followers and likes by sharing <i>it</i> : photos you took! In this course, you'll learn the history of photography, tips for taking amazing photos with your smartphone, photo editing techniques for enhancing those photos and how to build a portfolio worthy of a college application. (smartphones will <i>not</i> be provided)
THI3M	11 Technology	Green Industries	This course enables students to develop knowledge and skills related to agriculture, forestry, horticulture, and landscaping. Students will study the identification, growth, and management of plants and animals and develop process, design, and management skills required in the green industries. Students will also examine social and economic issues related to the green industries, learn about safe and healthy working practices, study industry standards and codes, and will explore postsecondary education programs and career opportunities. Prerequisite: None
TP13M	11 Technology	Healthcare (Practical Nursing)	This course enables students to develop their understanding of basic health care procedures, including the safe use of appropriate instruments, equipment, and materials. Students will focus on health care fundamentals, including the anatomical features and physiology of the major body systems and the factors that affect homeostasis in the human body. Students will develop an awareness of health and safety issues in the health care field, analyse environmental and societal issues related to health care, and learn about professional practice standards and career opportunities in the field. Prerequisite: None

## 2024-2025 Day School eLearning - Proposed Courses with Descriptions

*\*Actual course offerings are subject to change based on student requests*

Regular Day School eLearning		
Course Code	Grade Subject	Course Name
TO14C	12 Technology	Child Development and Gerontology
<p>This course enables students to examine the stages of child development and the aging process. Students will study the processes of disease and factors contributing to health and well-being in early and later life, and will develop skills required to meet the needs of children and older adults (care skills). Students will also learn about legislation governing the care of children and older adults; evaluate social and recreational activities, programs, and services for improving quality of life; and develop an awareness of health and safety issues, environmental and social issues, and career opportunities related to child care and gerontology.</p> <p>Prerequisite: None</p>
